

SEE BEYOND THE VISIBLE

THERMAL IMAGING

INSPECTION SUPPORT

**See the difference.
Know where to look.**

Thermal and visual documentation to help your team identify areas of concern and focus further investigation.

THERMAL APPLICATIONS

DJI MATRICE 4T / THERMAL + RGB

Roofs & Building Envelopes

Document temperature patterns that may indicate moisture or insulation concerns, with visual context for further investigation.

Electrical & Utility Assets

Capture accessible transformers, substation equipment, and exposed components for review by qualified electrical personnel.

Solar Arrays

Document panel-level temperature patterns and visible conditions so maintenance teams can target further investigation.

Mechanical & HVAC Systems

Capture accessible rooftop HVAC and exterior equipment. Create baseline records and repeat imagery for condition comparisons.

CLIENT DELIVERABLES

01

Branded PDF Reports

Annotated observations, asset references, and areas of interest.

02

Thermal + Visual Images

Paired imagery with temperature observations, where suitable.

03

Organized Project Files

Labeled image sets and radiometric originals, as scoped.
