

## **SQT Liquid Crystals**

EVERYTHING  
YOU NEED  
TO KNOW

*Info Pack*

**V i V E N T E**

skin . brows . sugaring

*Hi there!*

Thank you for inquiring about  
our liquid crystals (SQT)

This little eBook is  
designed to give you more  
information about liquid  
crystals / bio-  
microneedling (SQT)

[more details : www.viventeskincare](http://www.viventeskincare)

*Hi, I'm Kim*

owner / manager of Vivente

I am so proud of being able to offer consistent high quality skin services. My main focus is to develop Vivente's Team to be their best ever.

I love our tiny space that feels incredibly welcoming and relaxing. It's my place of 'Zen' and I sincerely hope that you will feel the same.

Our skin philosophy for the last 33 years is to retain the skin's integrity while de-accelerating the aging process!

*Our Mission is to Care  
More for Your Skin*

## What is bio-microneedling using liquid crystals?

Bio-microneedling, is a comfortable treatment with minimal downtime.

It stimulates your skin's natural healing process, encouraging collagen and elastin production for smoother, firmer, brighter and more youthful-looking skin.

It's a natural rejuvenation treatment that improves texture, tone, and overall radiance. You may experience some mild redness for a couple of days following your treatment.

It uses tiny biological 'crystals' that are straw shaped. When they are massaged into the skin, it results in micro-injuries.

These tiny like crystals called spongilla spicules are derived from freshwater sponges. These natural microneedles are granulated into a fine powder.

Even though they are seen as a powder to the naked eye, under a microscope, they simulate the look of a sharp ended straw-like structure. We even have a microscope in the salon so you can see for yourself!

The SQT bio 'needles' mimic traditional skin needling results. But without the drama of broken skin and extended redness.

# SQT Advantages

- All natural ingredients
- No chemicals, fragrances or acids
- No use of needles or devices
- No numbing cream required
- No breakage of skin or bleeding
- No risk of cross contamination or infection
- Spicules are safe for all skin types
- Minimal down time 3 -5 days
- Short application process
- Safe for pregnant and breastfeeding women
- Safe on active acne
- Natural pigmentation inhibitor
- Lower risk than other treatments
- Increase hydration and decrease inflammation

# SQT Benefits

- Stimulates collagen and elastin- enhance your skin's elasticity and firmness
- Create micro-channels to facilitate deeper penetration of skincare ingredients (meaning everything works better!)
- Rapid skin rejuvenation (You won't believe how fresh your skin looks after 2 days)
- Shorten skin renewal cycle to about 7 days compared to 28 days with traditional microneedling (so there is much less downtime)
- Pure formula delivering a superior treatment experience
- Gentle and natural - lower risk of allergic reactions
- Exfoliate dead skin cells revealing fresh, glowing skin

# Skin Issues :

that get amazing results:

Rough texture  
Pigmentation & uneven tone  
Crusty brown patches  
Fine lines  
Wrinkles  
All signs of premature aging

Stretch Marks & Acne Scarring  
Open pores  
Collagen loss  
Blackheads & whiteheads  
Rosacea  
Active Acne

<b>Bio-Microneedling</b>	<b>VS</b>	<b>Skin Needling</b>
1 session		3-5 sessions
3000% Product Absorption		500% Product Absorption
7 day cell turnover		28 day cell turnover
3-5 Million Micro channels		>200,000 Micro-channels
Zero risk of infection		Risk of infection
15 min Application		30 min Application
No Skin Penetration		Skin Penetration
Can be used on Active Acne		Cannot be used on Active Acne

# What happens during the Treatment?

The first phase in SQT Bio Microneedling is the implantation of 3 to 5 million siliceous microneedles, that are extracted from a fresh water sponge

These needles are pushed into the epidermis (reaching the dermis) and will stimulate the skin for upto 72 hours before they naturally fall out

## phase one

The second phase of bio-microneedling is the activation of Basal Cells

## *Before* phase two

Basal cells are found at the bottom of the epidermis - the outermost layer of skin. Basal cells produce new skin cells. As new skin cells are produced, they push older cells toward the skin's surface, where the old cells die and are sloughed off - this is science, this is SQT

## phase three

Collagen Reproduction, Proliferation & Re-modelling

The implantation of spicules creates a wound healing cascade in the skin, the wound is rebuilt with new granulation cells. The wound is replaced with new dermal tissues and blood vessels, effectively remodelling the skin.

EPIDERMAL REPAIR

## *After* phase four

Epidermal healing, or re-epithelialization, is the renewal of the epidermis that has been damaged by a wound (SQT spicule implantation in this case)

# Aftercare Timeline

## Day of treatment

- do not touch or wash the face or apply any products
- change pillowcase and drink plenty of water
- avoid direct sunlight and any heat generating activities

## Day 1-2

- lightly splash with water for 24-48 hours ( not hot water)
- apply recovery serum am and pm
- avoid direct sunlight and heat generating activities

## Day 3-5

- use gentle cleanser
- use zinc based sunscreen
- avoid direct sun as much as possible

## Day 6+

- it's safe to can commence more active ingredients

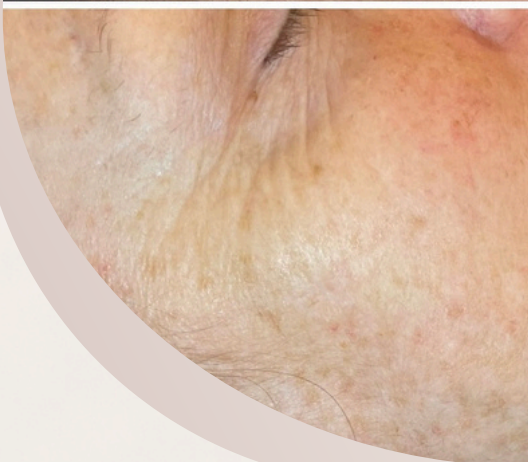

# What happens at your appointment?

At your first visit we ask you to complete our consultation form and ask you more detailed questions, mainly to assess sensitivities. We discuss any risk, benefits and contraindications, the history of your skin, your concerns, what products you use currently and what skin goals you would want to achieve.

We will then work out a treatment plan for you. We will be taking before and after photos to assess your progress.

*Our Vivente team care about helping clients.*

It can take months for you to get your best possible skin and we will work closely with you to ensure you are aware of the process and direction we are going in and teach you how to achieve your best skin.

# *Other treatments offered:*

Nurturing Facial Treatments

Traditional Micro-needling

MediLift ShiBata

Mild Skin Peels

Skin Tag Removal

High Frequency

Electroporation

RF for firming

LED light therapy

Body Sugaring

Electrolysis

Eyebrow Design

Brow Colour Enhancements

*All personalised for your specific needs*
