

Dear Customer,

Kentarus Group Inc. (KGI) is pleased to announce that we have formed a strategic partnership with Brinks Home Security and one of their authorized dealers, Alpha One. Brinks is one of the most well-known leaders in its industry and has provided the best in home security products and services for the past 30 years.

At Kentarus Group Inc., it is our goal to effectively improve communities across America. However, with the continued rise of crime in our nation, we do not feel that we can effectively improve our communities without securing them as well. That is why we want to offer our customers and clients not only peace in knowing that we will make quality improvements to their homes and businesses, but also peace of mind.

When we set out to find an area home security company that would be one of the best in our community and not just in it for the bottom line, we found Alpha One. And while Alpha One offers the best in Brinks Home Security systems, it is their commitment to best practices that sets them apart from their industry counterparts. KGI and Alpha One both share this commitment as well as a passion for making sure that we provide quality service and support that is second to none.

This powerful partnership and relationship with Alpha One has allowed Kentarus Group Inc. to offer the FREE installation of a security system in the homes and businesses of our customers and clients. Imagine the benefits of having a four (4) camera HD 1080p hardwired security system with nineteen (19) points of protection onsite. Such a system enables one to monitor their property, near or far at their convenience, with the use of a smart phone.

KGI is happy to offer this and other security systems, completely FREE of charge, to all of our eligible customers and clients who have had a job completed by Kentarus. The best part is that the only thing you have to do is choose the security system and monthly price that works best for you! From the base system to the complete smart home package, we just want to help our customers feel safe and secure.

**Please follow the simple steps below to ensure that your property is safe and secure:**

1. Inform your KGI Account Representative that you would like to move forward with the installation of your FREE security system
2. Select the security system that is best suited for your home or business
3. Verify with Alpha One that you are approved for the security system package of choice
4. Choose your security system installation date (systems will typically be installed within 48-72 hours)
5. After your security system installation is complete, reach out to your KGI Account Representative and let them know that your property is safe and secure

It is our hope that you enjoy this benefit of being a valued Kentarus Group Inc. customer. Thank you, and we look forward to serving you!
