

# BONEXID<sup>®</sup>

Improve Bone Health  
in Just 6 Weeks

by

  
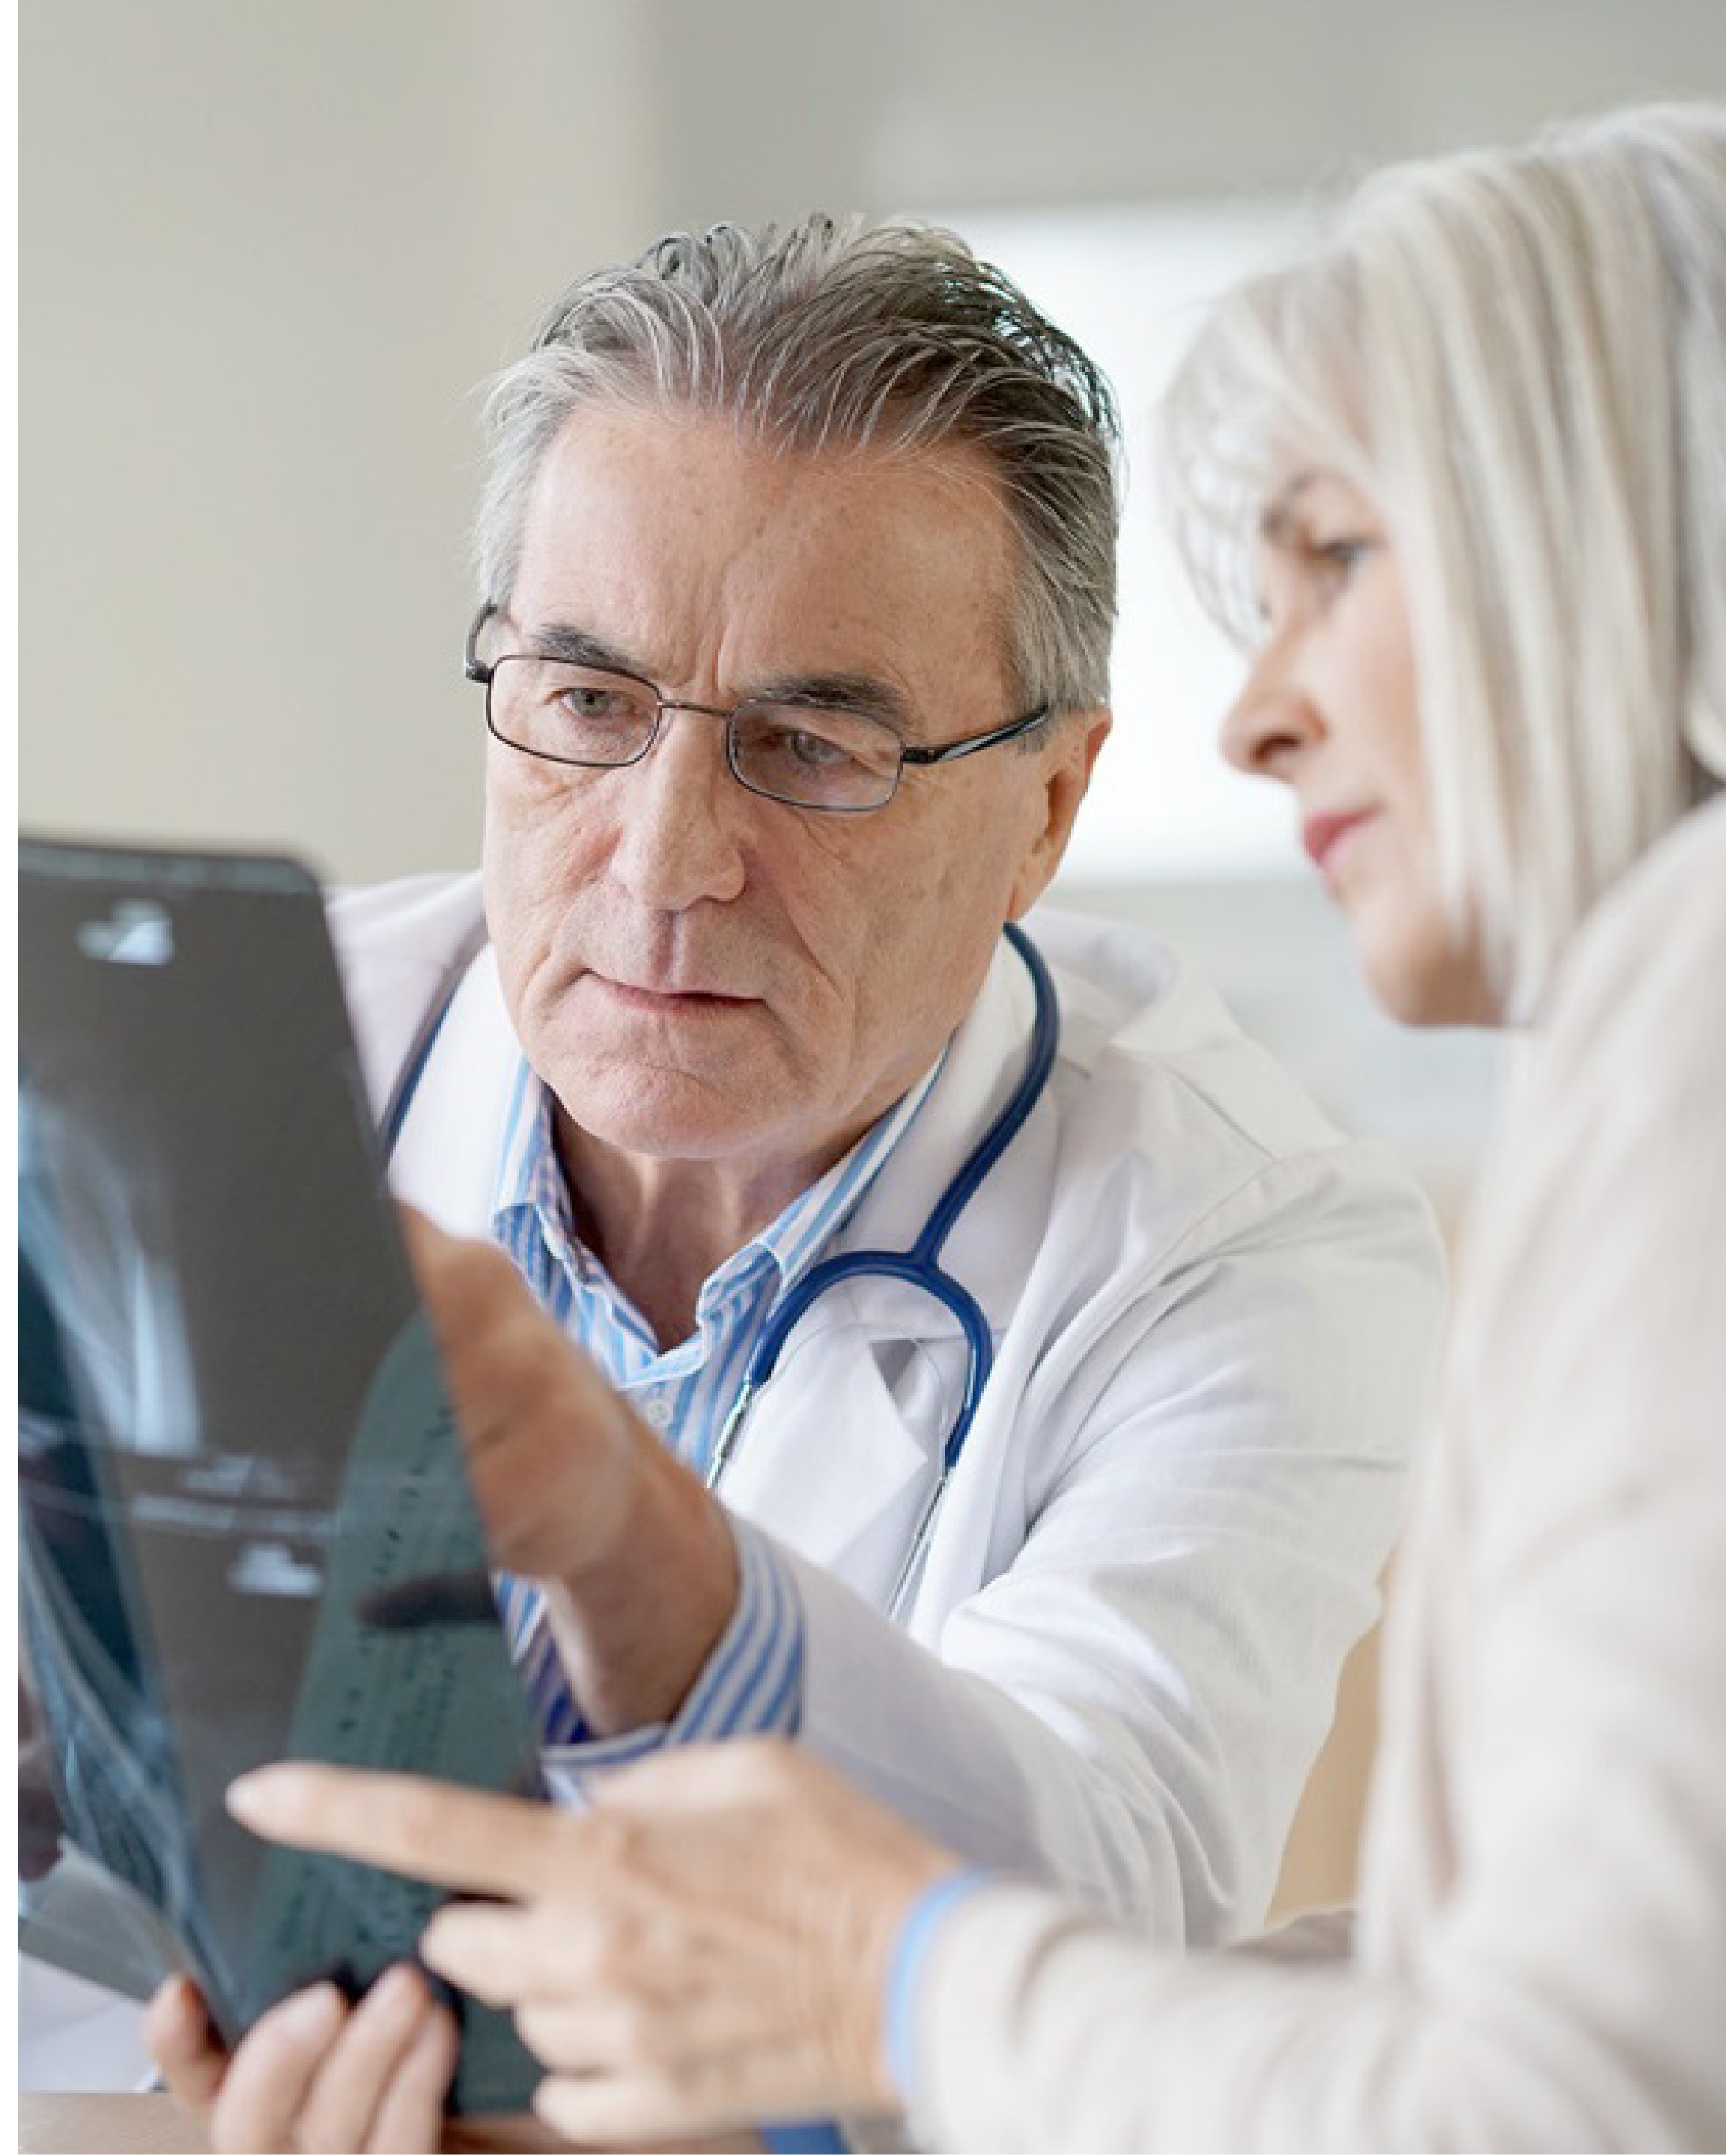

cannOGen

Delivering Innovations in  
Nature, Science & Medicine for  
Breakthroughs in Your Health

# THE PROBLEM

- Today's **modern diet is highly acidic** due to the type of foods we eat: overly processed, high in salt, sugar and unhealthy fats.
- Continually eating this way – day after day, year after year – **forces our bones to act as “buffers”** to neutralize the overload of dietary acid.
- **Bones release the “buffers” – bicarbonates** - that bind to the acid in our blood (from the diet we eat) and neutralize it.
- However, bicarbonate *passively carries calcium* with it as it leaves our bones.
- Calcium then starts to build up in our blood. To avoid this our body **excretes the calcium through urine**.
- Due to this process, over time, **our bones become weak, fragile**, and the **risk of fractures along with osteoporosis increases**.

# THE SOLUTION

## BONEXID®

Our patented, clinically tested formulation works. It does this by supplying bicarbonate directly to your blood, so your body does not need to release it from your bones.

*That means BONEXID® works to actively stop calcium loss from your bones.*

**BONEXID®** has been clinically shown to:

- Increase calcium levels
- Support effective calcium utilization
- Increase bone formation
- Decrease calcium loss
- Decrease bone breakdown
- Rapidly enhance overall bone health

**ALL IN AS LITTLE AS 6 WEEKS**

# BONEXID<sup>®</sup>'S BONE BOOSTING INGREDIENTS

VITAMIN D

## Vitamin D

- Vitamin D is essential in protecting your bones.
- It enhances your body's ability to absorb calcium, along with supporting muscles needed to avoid falls.

## Folate

- Increased levels of homocysteine - amino acid found in blood - breaks down bones and reduces bone density.
- Folate decreases homocysteine levels in the body and helps to reduce fracture risk.
- Many of us have elevated homocysteine levels – associated with poor bone health.

VITAMIN B

## Pantothenic Acid

- Anxiety and stress are risk factors impacting bone loss and density.
- Pantothenic Acid is a B vitamin, often referred to as the "anti-stress" vitamin.
- This vitamin supports adrenal function and a healthy nervous system - diminishes the impact of stress on our bones and bodies.

# BONEXID<sup>®</sup>'S BONE BOOSTING INGREDIENTS

## Potassium Bicarbonate, Sodium Bicarbonate and Magnesium Bicarbonate

- These minerals are “alkalinizers” helping to pH balance your body.
- They add to the acid buffering system in the body that counteracts the buildup of acid from your diet.
- These potent nutrients securely hold calcium in bones to keep them strong, improve bone density, and stimulate bone growth.

## Proprietary BONEXID<sup>®</sup> Herbal Complex

- The complex contains: Sage Leaf Powder, Turmeric Root Powder, Thyme Leaf Powder, Rosemary Herb Leaf Powder and Holy Basil Leaf Powder
- Inflammation weakens bones - increasing the risk of fractures - and is at the heart of osteoporosis.
- This potent herbal blend has powerful anti-inflammatory effects, aids in preventing bone loss and in preserving bone structure.

# THE BONEXID® STORY – THE “NO CALCIUM” CALCIUM CURE

As the former head of Neurosurgery at Denver’s Children’s Hospital, Dr. Larry McCleary **worked with many children who were going through chemotherapy** to treat different types of cancer, from brain to leukemia.

Over the course of treatment, Dr. McCleary began to see the detrimental effects that chemo had on his young patients. In particular, how their bone health deteriorated dramatically, leaving in its wake thin, fragile, brittle bones. In talking to his patient’s parents and other adults, Dr. McCleary soon **came to realize that bone health was a pervasive issue for people of all ages**. Prompted by these observations, Dr. McCleary began diligently researching what he could do in order to make his patients’ and others’ bones and lives better.

In his research, Dr. McCleary discovered how our nutrition has changed over time. He found that **we eat a highly acidic diet and identified when our bones buffer this dietary acid, they become weak and brittle**. By providing **proprietary nutritional buffers** in BONEXID® – which are sources of alkalizing and acid-reducing compounds - **bones no longer need to be compromised through calcium loss**.

Thus, BONEXID® was created, then **clinically tested and shown to improve bone health, promote bone growth, decrease bone breakdown, and restore calcium balance** (without calcium as an ingredient!) **in just 6 weeks**. Now, this comprehensive solution is available to anyone looking for rapid results, sustainable improvement and optimal long-term bone health.

# DR. LARRY McCLEARY

Dr. Larry McCleary is a board-certified neurosurgeon, whose credentials include:

- Rufus Choate scholar & graduate in Physics at Dartmouth
- Graduated 1st in medical school class
- Residency in Neurosurgery at NY University –Bellevue Medical Center
- Former Head of Neurosurgery at Denver Children's Hospital
- Co-founder, President of Shining Stars Foundation (provides year-round programs for children with cancer)
- Author of The Brain Trust Program, Feed Your Brain, Lose Your Belly, and The Fracture Cure (2019)

# REAL RESULTS

In only several  
weeks

- Nancy F., 52 – **Improved Bone Health by 52%**
- Sewell W., 59 – **Improved Bone Health by 41%**
- Maria D., 50 – **Improved Bone Health by 36%**
- Nancy N., 61 – **Improved Bone Health by 31%**
- Ray C., 47 – **Improved Bone Health by 26%**
- Liesel K., 40 – **Improved Bone Health by 16%**
- Judy G., 71 – **Improved Bone Health by 8%**

# OVERVIEW

BONEXID<sup>®</sup> has been  
shown to:

- **Boost bone formation** & minimizes bone loss
- Enhance **calcium retention** in bones
- Restore calcium levels for **long-term bone health**
- Improve **bone density, strength, and support**
- Promote **more efficient use of calcium in the body** for maintenance of strong, healthy bones
- **Help prevent osteoporosis** and other bone and structural deficiencies
- Developed by Dr. Larry McCleary, MD, Author of “The Fracture Cure”
- **Patented** Formulation
- Backed by a **gold standard human clinical trial**
- Results published in **peer-reviewed medical journal**
- **Clinically-proven ingredients** with no artificial colors, flavors, or preservatives.
