

WHY ARE WE SICK ? - IMPORTANT FACTORS THAT CAN TRIGGER AND AGGRAVATE DISEASES

RF RADIATION – a ‘possible carcinogen’ (WHO 2011), impacting every living being, has been shown by thousands of studies to be related to **sleep issues, cancers, neurologic, cardio-vascular and auto-immune diseases, infertility, autism etc.** By weakening the immune system and affecting the cells’ membrane, it can **dramatically increase the effect of any poison or pathogen present in the body.**

Sources: WIRELESS ROUTERS, DEVICES in the house, at school and at work, **MOBILE PHONE RADIATION** - especially when connected to the Internet (WiFi, Mobile Data, Bluetooth), **ANTENNA MASTS, TOWERS, SMALL CELLS (5G)** – The increase in radiation intensity has been dramatic in the last 3 years in communities due to deployment of new mast antennas but also high frequency 5G small cells which in itself can be in time lethal.

FACE MASKS - Not only that face masks are not efficient against the spread of viruses, but wearing them brings over a host of very real health problems. There is clear experimental and scientific proof that face mask wearing causes **deprivation of oxygen and excess carbon dioxide in the body.** Chronic wearing facilitates respiratory diseases, particularly **bacterial pneumonia.** Furthermore, toxic substances such as **graphene oxide, ethylene oxide and breathable carbon nano-fibers & microplastic** have been discovered in medical and commercial face masks. Consider that no risk assessments have ever been done by the schools, healthcare institutions or any other institutions that required the mandatory wearing of face masks. Statistical data and studies comparing different areas/countries in 2020-21 showed that the **wearing of masks correlated with more covid infections and mortality.**

LED LIGHT - BLUE LIGHT (or white light saturated in blue radiation) from phones & other devices screens, car lights, public and home lighting has got a damaging effect on the eyes & the body, leading to **eyesight damage, sleep issues, cancers & auto-immune issues (A.M.A.).**

Pulsed Led light can be used for 6G Terrahertz communication, which can have a destructive impact on the human DNA (due to EMF resonance).

GLYPHOSATE (ROUNDUP) - a ‘probable carcinogen’ (WHO)

affecting all forms of life, has been widely used in agriculture and weed-killing; it is pervasive in soil, water, air and can be found everywhere, but especially in cereals, processed foods, on the footpaths, grass, bushes, trees, other plants & soil sprayed by the councils in communities .

Numerous studies prove that it is a strong **genotoxic, causing leaky gut, autoimmune, renal & neurological issues, autism, cancers etc.**

PCR/ ANTIGEN TESTS - the PCR test, as disclosed by its late inventor, Nobel prize winner dr. Karry Mullis and also by the FDA manual of the test is **not able to detect viral infection nor to differentiate between pathogens;** it can be set up to detect from all positive to all negative results proportional to the number of cycles used. A great number of doctors, scientists, lawyers and human rights activists have revealed that **the PCR tests are not fit for purpose and two European Courts (Lisbon, Austria) have officially recognised this fact.** The CDC has given up to the use of PCR tests, in favour of the antigen test, which has also proved to be unreliable. Both involve the use of **SWABS**, and independent researchers have discovered in these very toxic materials such as **ethylene oxide, sodium azide, carbon nanofibers, metals & graphene oxide/ hydrogel.**

WHY ARE WE SICK ? - IMPORTANT FACTORS THAT CAN TRIGGER AND AGGRAVATE DISEASES

VACCINES have been deemed by the US Supreme Court as **UNAVOIDABLY UNSAFE**. None of them has been investigated for their **genotoxic & carcinogenic effects**, interactions with other vaccines or medication, long term fertility and autoimmunity impact. Some of the WHO scientists, together with numerous experts, doctors and nurses around the world criticized the safety and efficacy of vaccines, esp. due to the use of toxic preservatives & adjuvants such as **aluminium, formaldehyde, polysorbate 80** and **thimerosal** (mercury compound still present in many flu shots). Vaccines have been found repeatedly to cause the very disease they were deemed to prevent & to contain **cancer causing viruses and genes associated with cancer, aborted fetal cells, toxic chemicals and great amounts of non biocompatible, non biodegradable contaminants (Corvelva Italy 2018-2020 , 2017 study by Antonietta M. Gatti & Stefano Montanari)**. In 2021-2023, **SELF-ASSEMBLING NANOTECHNOLOGY** based on **GRAPHENE OXIDE** has been found in **covid vaccines, but also in vaccines commonly given to children, flu vaccines (incl. nasal sprays) and various other injectables** (La Quinta Columna, dr. Robert Young, dr. David Nixon, dr. Ana Mihalcea etc). Billions have been paid for vaccine damages in vaccine courts by governments, as there is no liability for the producers. Consider that the four main vaccines producers in the US have paid more \$35 billion for lying & defrauding the regulators. Among them, Pfizer ranks first, Astrazeneca second (violationtracker.goodjobsfirst.org). Thousands of doctors, scientists, activists and parents have warned in (censored) videos and social media posts about the effects of vaccines as manifesting in **sudden autism, severe neurological and auto-immune reactions, cardio-vascular problems, sterility, death**.

THE FLU VACCINES, though not reported by the NHS, **can cause brain damage, neurological and respiratory disorders, coma and death (FDA)**. The mercury component has been found repeatedly to be toxic and to have a **highly synergistic damaging action against the brain cells in association with aluminium**; many papers show a **positive association between the intake of this vaccine and autism/ Alzheimer**. Other studies have shown that flu vaccines, by interfering with other respiratory viruses, particularly coronaviruses, **aggravate the disease meant to prevent**.

COVID/ mRNA VACCINES - these vaccines have been **completely new and experimental, unlicensed products, authorised for emergency use only**. The emergency is justified only by a humanitarian crisis that cannot be solved with other means, while official data prove that **there was no significant excess death** in 2020 and therapies based on **Ivermectin, HCQ+Zinc/ Quercetin, IV Vit. C/ D, Melatonin** (cv19early.org), **Chlorine Dioxide** (comusav.org) have been used by thousands of scientists and doctors and proved safe and effective in the treatment of covid-19. According to the researchers of La Quinta Columna & dozens of other independent experts, these vaccines contain **nanoparticles of GRAPHENE OXIDE, METAL DEBRIS & SELF ASSEMBLING NANOTECHNOLOGY** which can explain the strange electromagnetism observed with vaccinated people and also the huge reported damage (**tens of thousands of deaths and millions of severe adverse reactions, esp. neurological, cardiovascular and reproductive damage** recorded by VAERS—US, MHRA—UK, EudraVigilance—EU, estimated to be **1-10% of the actual cases**). **Numerous doctors and scientists warned** that these experimental vaccines will lead to a **global humanitarian catastrophe** and asked **for an immediate stop of their use, especially in pregnant women, children and youth**, who have no real risk of dying from covid-19. A direct correlation between the rollout of these vaccines and excess death (younger ages esp.) has been observed worldwide and was much greater than the excess death resulting from covid only.
