

How to get rid of a Smart Meter. Letter for Utilities (1)

Dear Utility

I am writing to request removal of the Smart Meter at my property which was installed by your company.

I have sought legal advice and am aware that the installation is ILLEGAL, not INSURED and that you are LIABLE for any harm caused to me or my property by the radiation emitting from the Smart Meter every 20 secs 24 hours a day.

I have also been in consultation with an EMF specialist who has measured the radiation coming from the Smart Meter & have Video proof.

I am in receipt of information which shows my Legal stance. I am informed that you have already been sent this information and that you are aware this radiation is not only extremely dangerous but that it is causing serious health problems. See link below. Safety Code 6 (2015) which states the Law.

Do not bother to send me outdated junk science from Public Health England, it is out of date & therefore not applicable.

If the Smart Meter is not removed within 2 weeks of your receipt of this letter I will be stopping my direct debit and all payment to your company will desist.

If I wanted to monitor my power I could purchase a safe gadget from Amazon for a mere £8.99. Smart Meters are costing £420 per household, extra for blunders.

No I don't want it decommissioned or dumbed down thank you, I'm aware that's just one of your fob offs.

Safety Code 6 (2015) Shows the Law. The radiation is ILLEGAL. See link.
