

SensaCo Ltd.

UTS-GP Series

Model:

UTS-GP-T11-xx

USB Temperature Sensor

Description:

USB Temperature Sensor UTS-GP-T11 is a USB Thermometer. It is a fast ,accurate and reliable method for measuring temperature.

The UTS-GP-T11 can be used with the UTS GUI, a windows desktop application for logging , visualization and real time graphs. A simple versatile command set is also available to integrate into existing or bespoke systems.

Ideal for hobbyist and commercial applications it is fast and IP67 rated with engineering support and code examples for easy integration.

Filtering logic as standard with additional advanced filtering mode available.

Compatible with Windows , Linux and of course Raspberry Pi.

Probe

- Cable lengths 0.6m,1.5m
- IP67 Waterproof
- Probe dimensions 15*6mm
- Small probe area for fast response
- Operating temp of the probe -10°C to 110°C

Product Highlights:

-50°C to +110°C probe temperature range
± 0.5°C Accuracy between 0°C and 45°C
0.5°C resolution (standard)
Windows and Raspberry Pi compatibility
ASCII command set
140 samples per second
Sophisticated input filtering circuitry
Advanced filtering mode
Full application and engineering support

Applications include, but not limited to:

Server Rooms
IoT Projects
Chamber and fridge monitoring
Weather Station
Temperature control
PC/ Raspberry Pi temperature monitoring
Thermostatic controls
Engineering and Development
Aquarium, vivarium and formicariums

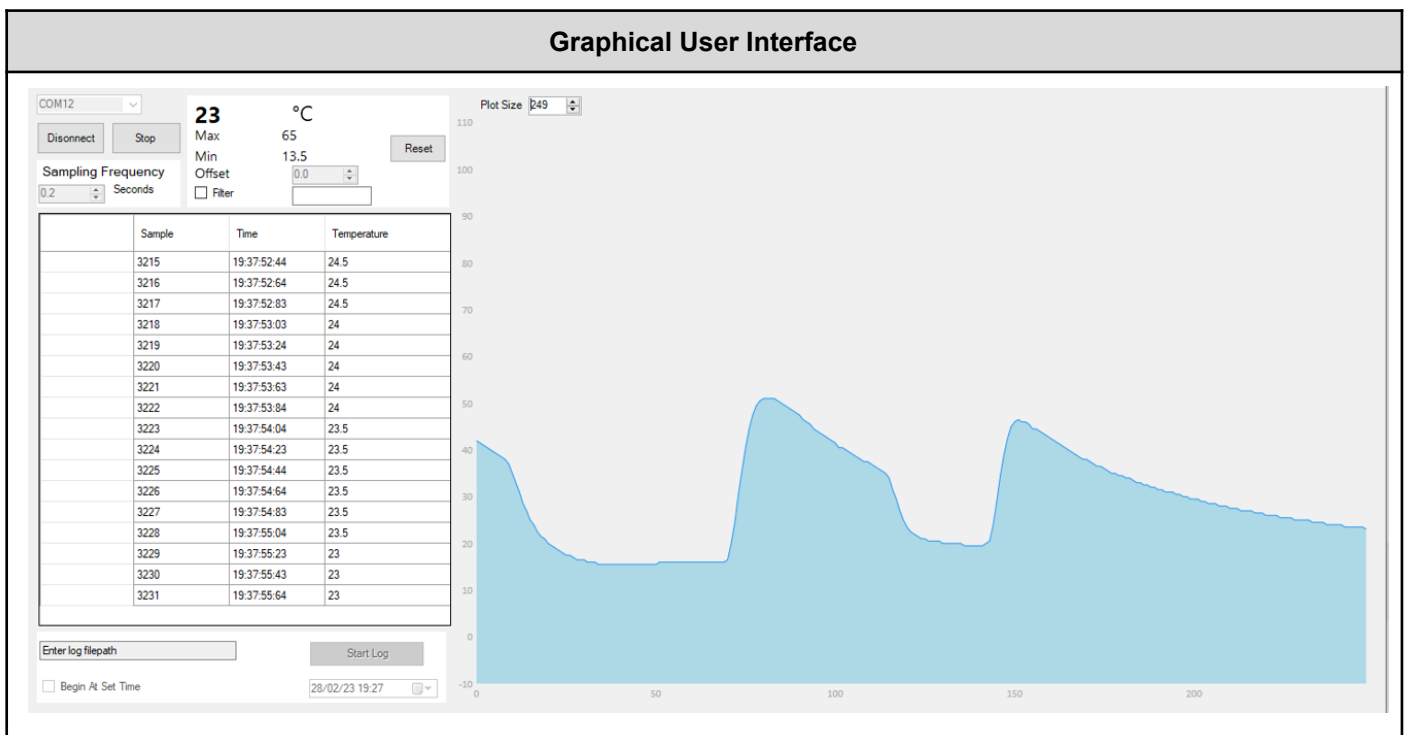

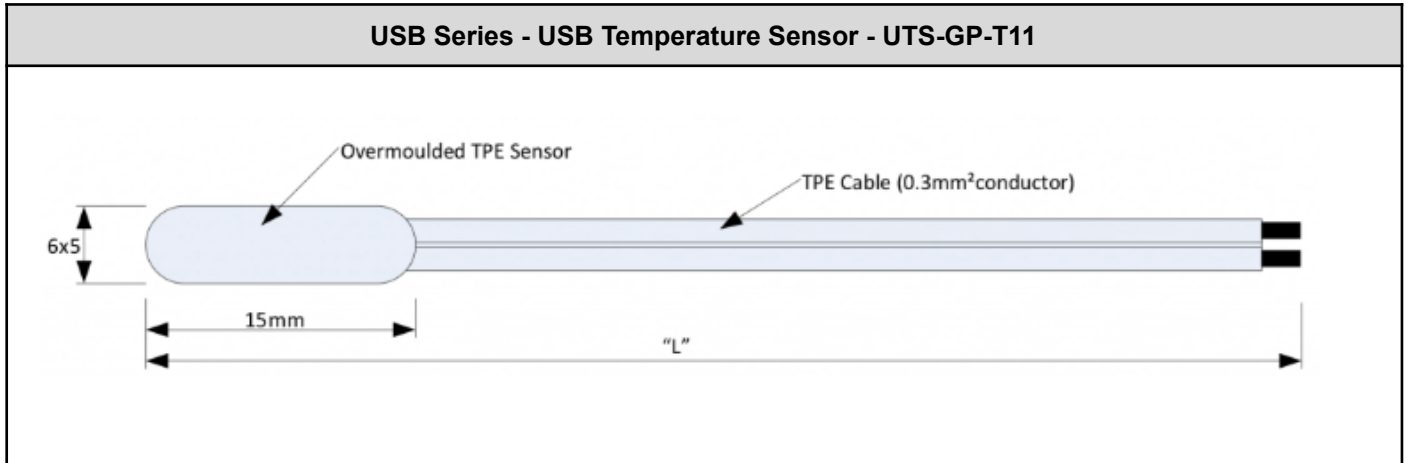

Specification:

USB Series - USB Temperature Sensor - UTS-GP-T1-X	
Sensor technology	NTC
Output Versions	USB serial
Supply voltage	5Vdc (USB port)
Temperature ranges	-10 °C to +110 °C
Accuracy	±0.5 °C (0°C to 45°C)
USB operating temperature	0 °C to +50°C
Probe Media temperature	-50 °C to +110 °C
Storage temperature	0 °C to +50 °C
Probe material	TPE
Permissible media	Non aggressive/corrosive
Cable sheath material	TPE
Environmental Protection	IP67
Sample Speed	7ms (max) 200ms with graphical user interface

UTS Command Set: UTS-GP-T11-x

Command Ascii	Response	# Data Bytes	Description
RX201	ASCII string	10	Poll Temperature Output Value Turn Stream OFF
RX202	ASCII string	10	Stream Temperature Output Value Stream ON
RX301	ASCII string	22	FW and HW Version of UTS Device
RX501	NA	NA	Enter advanced filtering mode 10Hz
RX502	NA	NA	Enter standard filtering mode 140Hz

Command Summary

Communication specification

115200 Baud, 8 Data bits, , 1 Stop Bytes, Parity None

RX201

Poll Temperature Output Value Turn Stream OFF

Command : RX201\r\n

Return :1OK\r\n 24.5<\r><\n>

RX202

Stream Temperature Output Value Turn Stream OFF

Command : RX201\r\n

Return :2OK\r\n 24.0<\r><\n>

RX301

Request Firmware and Hardware version

Command: RX301

Return : FW-DtvX.X\r\nHW-vX.XXX\r\n

RX501

Advanced Filtering command

Command: RX501

Return : NA

RX502

Standard Filtering command

Command: **RX502**

Return : NA

Software

The UTS-GP-T11-xx can be used with custom applications such as C# , Visual Basic or Python projects or the downloadable UTS GUI that has a real time graph , minimum and maximum indication and a logging function.

When used with a windows PC used for the first time a driver may need to be installed for the PC to recognize the device.
