

Cainan Craun

Ella Shimovitz

Thank you for helping us make miracles happen for children with cancer! This year our goal is to help families financially, so they can concentrate on what's important: winning the fight against cancer!

Dayton Children's has completed their move into their brand new state-of-the-art patient tower with the new Mills Family Cancer and Blood Disorders Center. They are seeking ways to help make the experience for patient families even better. The proceeds will be donated to the hematology/oncology departments Needy Patient Fund. Proceeds will also go towards buying a "wee light" vein finder and gift cards for families whose children are being treated at the hospital.

5 year old Ella Shimovitz has Rhabdomyosarcoma of the biliary tract. She is a feisty little girl, who loves to sing, dance, and pretend cook. She wants to take up horseback riding after completing treatment.

Cainan Craun loved dinosaurs and referred to himself as Cainan Rex! Initially diagnosed with Leukemia at age 2, he beat it twice. But unfortunately, he was then diagnosed with a rare form of brain cancer. Cainan fought hard, but on January 20, 2018, he was called home to God.

Thank you for supporting Moms 4 Miracles and making miracles happen for local children with cancer.
