

## **A NEW WAY**

How Demand Side Economics Works  
And  
Why We Must End Debt Slavery

## Introduction

My journey to design a monetary paradigm that serves its people has come as a necessity. We require a just honorable infrastructure in order to evolve and coexist with technological advancements which will grow in number exponentially due to the compounded effects of imposed Moore's Law.

The current construction of the Federal Reserve "petrodollar" has failed to be a just measure of value leading to the erosion of law. The chaos currently effecting our planet remains the root cause of unlawful behaviour of our governance and corporatized leadership. The times will change and we must change with them.

The current United States Dollar or Federal Reserve note should be offshored in order to become an international trade instrument. The issuance of the United States Treasury Bond must be permanently suspended transferring the illegitimate debt to be serviced by it's trade participants agreeing to use the FRN at a manageable yield of 2% for 30 years. The participants shall pay for and enjoy the protection of Naval forces ensuring tranquil cross ocean trade. This retires the old debt.

The Forex market establishes the exchange rate for perceptive value against participating trade partners. The new domestic United States Dollar should be a public utility provided by the Treasury. The House of Representatives must oversee and provide the Treasury targeted powers to regulate the new Trust Dollar supply preventing disruptive monetary moral hazards.

# Sovereign Trust

The American National is the Sovereign of the United States. A plethora of court decisions affirms this truth. Every concept within this work is fully constitutional and has a tangible history.

The new monetary paradigm must be established as a public trust. The Trust Dollar is to be issued through mechanics of both need and merit. Demand for new currency will have several sources of creation.

The Treasury should issue government operative and infrastructure currency by order of the House of Representatives for appropriation. Government employees and contractors will add to aggregate supplies of currency entering the open market.

Hard government assets require no indebtedness of it's people. The creation of currency does not require the people be burdened by a usurus issue.

The results of debt currency are collamitous. The fraudulent actions of the current government and it's majority donors of elected officials has spawned multitudes of nefarious actions.

The repugnant activity now has been revealed to include partnerships funding high crimes including genocide and unlawful use of military assets in protection of an unlawful status of drunken empire.

The people demand a remedy which will include reconstruction and reform. The forced growth debt money model must end.

The honorable population are currently servicing national debt without a proper social contract. The debt is imposed without agreement. This condition is fraudulent.

The Trust Dollar must be pegged to the basic troy ounce of silver. Silver value must be in comparison of a number of hours of basic entry level labor. Basic labor value must be compared to ratios of other tangible measures including British Thermal Units, Kilowatt Hours, Troy Ounce bullion Gold, Terabyte data space, Hectors of Farm Land, a Gallon of gasoline, Bushel of Corn and Private property living space square footage and or private acreage.

The market's creation mechanics should come from on demand commercial bank ledger entry loan issuance.

Qualified loan applicants are assessed upon prior deposit history. The loan mechanics shall not bear compounding interest. Usury shall be abolished. Commercial Chartered Banks shall offer transparent contracted loans with fixed profit added to principal for business and private luxury.

The Federal limit of added profit shall not exceed fifty percent added to a loan principal. All ledger entry loan principal is to be surrendered to Treasury. Profits shall be split evenly with depositors. Both banks and depositors shall be taxed by a percentage of awarded profit to be the owners of Bond Purchases. The mandated purchase shall be Federal Service, State General and County Municipal bonds for infrastructure and Federal level Sovereign Social Service Trust Fund complexes.

This mandated purchase is an issuance of bond ownership. The population at large owns participation within the commercial charter bank sector. Commercial Charter Banks are free to sell service bonds at profit. Mandated bonds purchased are commercial bank stock ownership provided by the open market. Surrendered principal of commercial bank credit funds State chartered Banks for personal infrastructure defined as education tuition, automobile and private home property. Personal infrastructure credit is void of bank profit.

A three tier sales tax is levied by Federal, State and County. This services the yields for social services. General and Municipal bond complexes are the nation's debt which is owned by the population benefitting the people directly.

The currency must retain physical construction along side a digital make up. This ensures private transactions not be prey for ambitious government. All private transactions are not subject to taxation. Nano infused counterfeit proof notes must remain along with fractional and full denomination bullion specie. Emergent currencies shall be permitted by States to issue commemorative silver rounds without denomination. During emergencies state treasurers or governors may declare a monetary value for the silver state rounds during power outages.

The Treasury will issue nano infused counterfeit proof Cash notes printed in red with one year expiration dates in amounts up to \$100,000 for families displaced by natural disasters. Vendors redeem "Cart Rouge" cash that is later destroyed by Treasury.

# Taxation

The Domestic debt is contained within the Sovereign Trust socialist complex. The socialism elements are isolated and restricted from intruding upon the free market.

The free market funds the necessity of a beneficiary public as to provide it's safety net while ensuring a competitive open market with minimal government intrusion. This should make both dominant ideologies agreeable enough to balance each other within civil debates.

The free market interested will be assured the elimination of conditions which cause monopolies to exist by the open plethora of competitive participation within the arena of vibrant innovation and choices.

Free market principles will use existing laws such as antitrust to ensure the elimination of kleptocracy. This will be ensured by Congressional oversight preventing the oligarch status to exist.

The states through their representatives in the Senate shall check public federal power and collections threatening federal and corporate gatherings of dominant positions.

Within this structure there is no National debt. There is also no need for direct taxation of private property or personal income. This is a true affirmation of the Fourth Amendment. The people shall be secure within their possessions.

*This new way of thinking is defined as Proprietarianism. The population owns the nation.*

The Domestic bond debt directly serviced by the three tier retail sales taxes provide county and state infrastructure as well as the Sovereign social beneficiary complex. Federal operations are directly payed by Treasury issued currency on demand by the House of Representatives and executive endorsement. This provision does not leach into the free market arena.

States and Counties are limited to taxing industrial and commercial property, raw materials for construction and manufacturing as well as mining and natural harvesting such as commercial fishing. All lower taxation embeds itself into retail level pricing. The counties within the states also within the greater nation must compete for market share pressuring down prices benefitting the people.

This will pressure entities like unions existing within public service. Some states may outlaw government worker unions from collecting adverse amounts of power to coalesce. Counties and states may choose to create competitive marketplaces such as curriculum competitors for public schools.

The free market must be utilized to drive down costs while increasing value to its highest possible level. The government role must be a baseline regulation to be met or exceeded by lower levels. This is an affirmation of the Tenth Amendment.

The collection of states have differing needs. The solutions will be numerous.

# Social Safety Complex

What we call Social Security and Medicare can be transformed into a Solvent Retirement Fund and Health Assisted Life Obligation Fund as well as a Disability Obligation Fund benefiting the public. The only public debt within the Trust Dollar paradigm exists to service this domestic bond complex sector.

Another provision will be needed when Moore's Law effects permeate through the labor market caused by Artificial General Intelligence exponential efficiencies.

The Human Body Area Network Fund pays qualified displaced workers 60% of their market output value with existing currency which doesn't cause inflationary price distortion within the free market arena.

Employers deploying technology pay the fund 60% of the output equivalent of replaced employment. Treasury ensures solvency and has powers to fill deficits by redirected surrendered commercial bank loan principal or supplementary monetary issuance.

Payees acquiring re-employment drop off the program. This program is not payed for by bond issuance or sales taxation.

Contained domestic Bond Service will provide payment for all necessary medical procedures for all American nationals. The Health Assisted Life Obligation Fund Service bonds are dependent on Commercial Bank credit payments. Treasury will have power to supplement shortages of currency if needed.

HALO removes risk from health insurance providers creating a universally affordable market. Like removing risk from Chartered Banks insurance providers will grow participation while competing for customers in open market competition. This forces prices downward.

The Solvent Retirement Fund pays current retirees while allowing the greater public to buy greater shares from their Commercial Charter Banks.

*The debt service pays the owners of the issued debt. This plasma like feedback loop framework is the Helios Mechanism which replaces the debt and death Mandrake Mechanism.*

## Roles

The Federal role of government is to provide a common defense of the collective fifty states, their nationals and land property both private and public from foreign hostilities, settle disputes between the states through the Senate, create relationships of trade with foreign entities and create baseline standards and regulations to meet or exceed by the states. The domestic currency is paramount in providing a utility infrastructure to not favor or stifle participation within the vibrant market arena.

The states are compelled to protect their nationals and their properties from organic and fictional entity threats of physical and predatory natures.

The states provide a regulatory enforcement that meets or exceeds national standards aimed at providing utilitarian infrastructure meeting a universally federal agreed to coherent framework. State law cannot exceed Federal restrictions.

County government provides state enforcement of regulations with county specific state law. County and municipal governments collect Sales and Commercial property taxes to operate in cooperation overseen by state regulators.

Zoning for industrial land, commercial, agricultural and mining extraction property is a County role while residential private property is protected by municipal government. The taxation of all private residential property is abolished. Individual income is considered private property.

The Treasury's mission is to allow the vibrant free market to discover the true price with as little intervention as possible. The infrastructure provided must encourage as much competitive participation by domestic producers.

Domestic production must be protected from foreign participation not restricted by regulation imposed on domestic goods by providing a safe environment for the domestic workforce. When the people own their nation, their representation reflects their values.

Our laws will be rewritten to protect our future generations. We are obligated to live through the hardship of reformation. Our sacrifice today will ensure tomorrow's children a fundamental self determination.

## Conclusion

America is at a crossroads. A new monetary paradigm is being developed. The money they want to impose on you will not serve you. It will by design enslave you.

The same people who rule over this current system can't be left to control humanity moving forward. We must demand better.

I ask you this.

- What if the internal Revenue Service was turned on government to audit every department and agency in real time?
- What if a young couple owned a home outright within seven years after having three children?
- What if the country didn't operate in debt forced to grow even though their needs didn't require growth?

- What if the entire world began cooperating instead of quarreling over ancient fairy tales?
- What if you owned and fully controlled your destiny?
- What if defaults and poverty were ended just by strengthening the family?

Human beings are creatures of infinite possibility. We can have a better world.

We live in a world controlled by an organised crime network of psychotic narcissistic maniacs who wish to create hybrid programmable automaton homoborgs. They will cause the extinction of our species.

The time has come to dismantle their crime syndicate. Our species existence is at stake.

## Land, Air and Water

Law is the acronym Land, Air and Water. These three conceptual jurisdictions cover three statuses which the human being can be exposed during the actions of behaviours.

The concept of law is to protect property by force. Government is force which is implied and understood violence. This violence is pointed at any individual who violates the universal agreement to not harm others.

Law is defined at various degrees of harm and nature of harm. The first Property is the human body itself. All earned property is the extension of the first property. The physical harm or damage is considered crime. This is by definition the law jurisdiction of the Land.

Conceptual property such as the first or unique idea, copyright, broadcast, media of any nature exist within the ether and therefore is jurisdiction of the Air.

The property of mutual agreement benefitting two or more parties within a business or commercial activity, contract, code or transport of service or product is protected by the conceptual laws of maritime or Water. The water description elements are of the high seas or shipping.

Corporates or government infrastructures rely on license, title or certificate of validation and are not living. Corporates, companies and citizens are not the living. They are fictional entities. Air and Water are both jurisdictions of dead entities.

Proprietarianism is utilitarianism earned. Our core belief is in private property ownership. The statuses within a proper natural state must have coherent merit to be earned both by individuals and families.

People within the borders have different status based on conditions. An individual born within the nation's borders is a "citizen". The citizen reaching adulthood or age eighteen earns the right to vote at the citizen's state level if registered.

The Proprietarian model does require a Republic Protection Amendment to the Constitution wherein only Sovereign Nationals may vote in National Elections.

The Sovereign National is defined as a natural born citizen who has secured outright ownership of private property for residence.

The title deed of ownership registers the married couple or single owner of a home National voting rights.

National offices include President and Vice President and Congressional Representative. The Senate should be chosen by each State's legislature. This means the 14th and 17th Amendments must be repealed.

This provision protects the nation from a majority preying on the public. This provision also incentives property ownership. The primary benefit is an earned status. This status has the implied responsibility to vote for a qualified protectorate.

The Natural and Naturalized adult Citizen does have the right to vote for State and lower elections. Only citizens are eligible to hold elected office.

In order to have stable national government the people must earn the right to choose their national leadership. Merely reaching a prescribed age has proven foolhardy. Our representation reflects an adolescent state of mind caused by the targeted degradation of the American nuclear family.

This among other aspects of our current condition are a collection of subliminal warfare. The extention of childhood delays childbearing. The result is a lack of replacement.

The endebtedness also delays or foregoes childbearing. The responsible don't have children they can't afford. This causes a need for payers into the social safety complex that don't exist. The nation then imports new workers to fill the void.

This causes a flood of new demographics not having the same culture to become a danger to the indigenous population. We see this today in all western nations. This intentional attack on our population requires reversal and a complete repatriation of unlawful trespassers from our lands.

Any national employing unlawful trespassers should face loss of citizenship, surrendering of assets and ten years imprisonment for sedition of our physical population's tranquil existence. No parole is awarded before permanent exile elsewhere.

Other attacks on our nation exist within the food supply, pharmaceutical toxicity complex, weather modifying and worst of all genome and physical invasion of the human body itself.

Not only are the people utilized as cash farms from their sicknesses they are being controlled by programming. This indoctrination has been cultivated through the media complex and educational curriculum. We've been fed streams of subtle lies since inception.

By leaving out small percentages the perception is altered enough to steal mass opinion. The five percent untold makes an exponential difference within the zeitgeist.

The large tech companies created by the military industrialists are now building a global capture complex wherein no individual will have agency of self determinative autonomy. They will and do have the ability to impose thoughts within the human mind.

This is not speculation or science fiction. This hidden agenda is the beast system planned. All the dystopian novels and prophecies were not warnings. They were playbooks.

All concepts widely accepted as true are not. They are three decades ahead of known technology currently within the open market. They have unthinkable abilities.

They can turn off the human body's electromagnetism. This means your heart stops. They can destroy all life in an area from space using frequency. There is no fall out or radiation. This is the cold truth.

This at all cost must be removed from the hands of power or we all perish. This is our reality.

Why abolishing compounding interest saves humanity. We are social animals. Financial economy and consumerism are a degradation of what it means to be human.

Compounding interest is a predatory construct. If all debts were suddenly payed there would still be interest owed. Where does that currency needed to service the outstanding interest come from? It needs to be borrowed. This means default is part of the mechanism. This creates the myth of scarcity.

Resources aren't scarce the ability to harvest them is, unless you are willing to pay more than the value for the use of money borrowed. Where does our money come from? It doesn't come from your representative government. It comes from a bank with shareholders. Yes someone owns the Federal Reserve.

Your representation borrows an endless supply of currency to be payed by you. Eventually your ability to pay the compounded interest will be impossible. This is default baked in the mechanics of construction. You'd never build a house without a footing. This Mandrake Mechanism is poisonous.

The result is a complete domino effect of whole sectors of the economy failing. Look at your local mall. The cancer of debt money has destroyed the social centers of commerce. You now order your objects of worthless desires from a monopoly cyber mall without seeing the product in person.

The Helios Mechanism changes how money is created. The currency acts like plasma. From Hydrogen to Helium the star's elements go back and forth exchanging electrons.

This engine is manageable. The current monetary regime has failed to manage itself because the regulation of interest refuses to responsibly allow the nation to pay down and off its debt.

Who benefits? The owners of central banking. The shareholders refuse to halt lending profit from the increased enslavement of the not yet born.

You have a responsibility to end this practice. You have no right to attach your ease to be payed for by individuals who do not yet exist. This is fraud at the highest level. This is also treason against humanity. The greenback dollar was created by Colonel Edmund Dick Taylor. This new construct is a return to Lincoln.
