COMPOSITE DECKING

Premium Composite Decking – Solid & Grooved Edges 12', 16', and 20' Lengths

Designed for durability and elegance, our composite decking offers a low-maintenance solution with high-end appeal. Available in a variety of rich, fade-resistant colors, each board is crafted to elevate outdoor living spaces with style and strength.

Choose from:

- Grooved or solid edge boards for seamless hidden fastener installation
- Available in 12 ft, 16 ft, and 20 ft lengths, our decking is:
- Resistant to moisture, fading, and staining
- Slip-resistant and splinter-free for safe, barefoot comfort
- Eco-friendly with recycled content and sustainable performance
- Perfect for patios, pool decks, rooftop terraces, and more

Whether you're building a backyard retreat or a commercial outdoor lounge, our composite decking delivers timeless beauty with modern resilience.

WPC CLADDING

WPC cladding combines wood fibers and plastic to create a durable, low-maintenance exterior solution. Resistant to moisture, rot, and insects, it offers long-lasting protection and enhanced weather resistance. Its natural wood appearance adds aesthetic appeal while requiring minimal upkeep, making it ideal for modern architectural projects seeking both functionality and style.

WPC Siding

WPC siding combines wood fibers and plastic to deliver a durable, low-maintenance exterior solution. Resistant to moisture, rot, and insects, it maintains its appearance over time without frequent upkeep. Ideal for enhancing building aesthetics while providing long-lasting protection, WPC siding offers a sustainable alternative to traditional wood with superior weather resistance and dimensional stability.
