Orange Tree Ice Green Opalescent Water Pitcher

By Larry A. Yung Jr.

This is a Water Pitcher that I have had many dreams about. A friend of the family found this pitcher sometime in the 1980's. It was shown at 1 or 2 conventions and has spent some time in a safety deposit box. As far as I am concerned it is one of the prettiest pieces of Carnival glass I have ever seen. The collection including the pitcher was offered for sale at the 2018 Tampa Bay Carnival Glass convention, and I was lucky enough to get it.

The opalescence can be seen on the top of the pitcher the handle and even on the feet. It has a marigold overlay and shows up real nice on my shelf. Tom Burns indicates that this may be a prototype. If you notice there is a band missing that normally connects the upper most Orange Trees See picture below. There has not been any other Ice Green Opalescent Orange Tree Water Pitchers or Tumblers reported.
