AUTOMATIC IDIYAPPAM MACHINE

PATENTED

Doc No. 378194001

Specifications

MACHINE DETAILS

- **Barrel Capacity** : 1.25 Kg
- **Gross Weight** : 23 Kg
- **Nett Weight** : 20 Kg
- **Dimension** : 30 x 25 x 65 cm
- **Motor capacity** : 60 watts
- **Input voltage** : 240V AC

STRING HOPPER DETAILS

- **Production** : 400 plates/hour
- **Thickness** : 0.9 to 1.1 mm
- **Diameter** : 100 to 150 mm
- **Weight** : 30 to 90 grams
- **Processing time** : 5 sec/piece

Product Values

WORLD CLASS STANDARD

Backed by the best quality

- Inverter compatible
- Energy efficient, eco friendly
- No maintainance required
- Cleaning is very easy
- Best for commercial kitchen

MAKE FOOD DELICIOUS

Beautiful Idiyappam in seconds

- Thin and soft idiyappam can be made
- Rice and all millets idiyappam can be made

**we dispatch to
all countries**

MADique Technologies Introduces Idiyappam machine that are industry leading in versatility - the Idiyappam size, shape, and thickness can be easily adjusted. It comes with both semi-automatic and fully automatic versions. An advanced power drive increases the accuracy, while protecting the motor from heating and overload. The Stainless steel enclosure and powder-coated internal parts renders long life with high resistance to wear-and-tear. All parts that come in contact with the flour dough are made up of 304 food grade stainless steel that can also be washed easily. The machines are very user friendly so any one can operate without any special machine operating skills. It has a very low footprint thus making it very compact and portable. There is absolutely no need of heavy actuators for powering using hydraulics or air compressor.

Next Gen Technology

The Compact model integrates Robotic technology in its construction which renders accuracy and premium quality in production of Idiyappams
