

Inno iNsight™

CRADLE TO GRAVE ACQUISITION MANAGEMENT

SOURCE SELECTION

BETTER RESULTS, FASTER AWARD,
TAILORED REPORTING

INNOVONOW.COM

The Global Positioning System (GPS). Supercomputers. Google's PageRank search algorithm. Artificial Intelligence. Speech Recognition. The Internet. Smartphone technologies. Seismic Imaging. LED lighting technology. Magnetic Resonance Imaging (MRI). The Human Genome Project.

Each of these transformative, American innovations was the result of Federal investment provided in the form of contracts and grants to innovative private companies and citizens. Behind each of these contracts or grants was a Federal contracts or grants professional who labored behind the scenes, often thanklessly and always tirelessly, to make the machinery of our Government and our nation run smoothly.

At Inno, our mission is to make the work of these unsung heroes just a little easier through the application of our own innovative software technology, **iNsight™**.

**SOURCE SELECTION
SOFTWARE**
designed for
THE FEDERAL MARKET

INNOVO

What if...?

FROM REQUIREMENT TO SOLICITATION TO AWARD AND BEYOND, **iN**sight AUTOMATES, STREAMLINES, AND STANDARDIZES THE SOURCE SELECTION PROCESS

iN

FOR CONTRACTING OFFICERS

Designed by retired Contracting Officers for active Contracting Officers (and their teams), iN

- ◆ Configures a variety of evaluation processes such as compliance evaluation, self-scoring, adjectival evaluation, and price evaluation
- ◆ Initiates each step in the proposal submission and evaluation processes
- ◆ Monitors progress of each evaluator and provides timely feedback as needed
- ◆ Reports each step in the evaluation process through canned and custom reports

iN

FOR OFFERORS

Reflecting a deep understanding of the typical Offeror's capture and proposal development process, iN

- ◆ An intuitive interface for submitting solicitation questions
- ◆ A rapid process for performing a self-scoring assessment
- ◆ A streamlined means for uploading and submitting proposal files
- ◆ An efficient approach to submitting clarification responses and revised proposals
- ◆ An audit trail to capture each Offeror action within iN

iN

FOR EVALUATORS

Whether evaluating one or one thousand proposals, the evaluation process should be easy, intuitive, and efficient. iN

- ◆ Allows each evaluator to perform their individual evaluation autonomously no matter where they are located
- ◆ Facilitates consensus evaluation, virtually bringing evaluators together from remote locations, as needed
- ◆ Provides for streamlined validation of self-scoring data submitted by Offerors

TRUSTED BY:

iN

BENEFITS

SECURE

Hosted in a FedRAMP-approved Amazon Web Services GovCloud with two-factor authentication and data encrypted in transit and at rest

ADVANCED REPORTING

Standard and customizable reports capture, organize, and present large and complex proposal and evaluation datasets in configurable, real-time reports generated instantly

RAPID EVALUATION

Automation and tailored functionality let evaluators focus on the evaluation and not the mechanics which accelerates and streamlines the process

HIGH QUALITY EVALUATION

Numerous integrated quality checks are enhanced by giving the Contracting Officer real-time visibility into evaluator progress and areas for improvement

SINGLE DATA REPOSITORY

All proposal and evaluation data is located in a single repository, preserving data integrity and allowing for fast and simple or advanced queries and reporting

DETAILED AUDIT TRAIL

Captures every time-stamped action in detail and stores the data for later retrieval and use in protest proceedings and for other legal and contractual matters
