Overview of the iNsight Application

- The first and only truly enterprise source selection application designed from the ground up for the Federal source selection process
- Designed for use by Contracting Officers, Offerors, Evaluators, and others
- Automates and streamlines the process for Solicitation development through proposal submission, evaluation, award and beyond
- Cost-effective for small procurements to multi-phase large, complex, high-volume, high-risk competitions
- Allows Contracting Officers, by virtue of a modular design, to compete an unlimited number of task orders on different vehicles
- Enables Contracting Officers to manage and monitor their entire portfolio of acquisition activity from a single interface and dashboard

INNOVO

iNsight At-a-Glance

- Web-based Software-as-a-Service (SaaS) with no software to download or install
- Infinitely customizable to match the source selection phases and evaluation methods (e.g., Compliance, Self Scoring, Adjectival, Go / No Go, etc.)
- Hosted in a FedRAMP-approved Amazon Web Services (AWS) GovCloud
- Two-factor authentication and data encrypted in-transit and at-rest
- Multi-channel iNsight Service Desk with phone, email, portal, chat, and text messaging channels
- Comprehensive training with customizable options for in-person, virtual, and ad hoc training
- Ongoing and continual enhancements included to meet customer needs

INNOVO

iNsight in Use

Contracting Officers

- May use a variety of evaluation processes such as compliance evaluation, self-scoring, adjectival evaluation, and price evaluation
- Controls each step in the proposal submission and evaluation processes
- Monitors progress of each evaluator and provides timely feedback as needed
- Reports each step in the evaluation process through canned and custom reports

Evaluators

- Supports all manner of evaluation techniques and is tailorable to each solicitation
- Allows each evaluator to perform their individual evaluation autonomously no matter where they are located
- Facilitates consensus evaluation, virtually bringing evaluators together from remote locations, as needed
- Provides for streamlined validation of self-scoring data submitted by Offerors

Offerors

- An intuitive interface for submitting solicitation questions
- A rapid process for performing a self-scoring assessment
- A streamlined means for uploading and submitting proposal files
- An efficient approach to submitting clarification responses and revised proposals
- An audit trail to capture each Offeror action for Contracting Officer use

INNOVO

Why iN Insight?

- Designed by experienced, retired Contracting Officers for active Contracting Officers and their teams
- The only Federal Source Selection application designed to scale to support hundreds of simultaneous source selections across multiple contract vehicles
- Provides customizable, real-time reports that instantly merge and report data across the entire evaluation lifecycle and meet the many Contracting Officer reporting requirements
- Uses artificial intelligence to help the evaluators evaluate quickly and efficiently, streamlining and reducing the evaluation timelines
- Scalability allows for a low price per source selection, taking advantage of scale economies
- Performs various sophisticated price evaluation checks in a fraction of the time of manual processes

INNOVO

iNsight Product Support

- All iNsight users are supported by an advanced Customer Success team
- An insourced Customer Success organization provides user support through Chat and other convenient channels
- Users can access support through email, live chat, text messaging, and a customizable support portal
- Knowledge documents and videos are provided on the support portal to guide users to solutions
- A standing Production Support team provides day-to-day, advanced technical support and troubleshooting
- Initial and ongoing training is provided in-person and virtually, using demonstrations and hands-on learning
- A dedicated Customer Success team provides VIP support to Contracting Officers and Evaluators
