NEW This Year! FELLOWS TEACH PROGRAM Thursday Evening, November 13th

CHF is proud to announce the addition of the TEACH Program. TEACH is a premier educational event aimed to provide EP, General & Interventional Cardiology Fellows-in-Training & Residents with in-depth knowledge about cardiac pathophysiology and the hemodynamics of mechanical circulatory support. This intensive evening session will provide deep insights into:

- The hemodynamics of mechanical circulatory support
- Comparative hemodynamics of different MCS modalities
- The physiology and hemodynamics of cardiogenic shock

Limited Travel Scholarships Available!

2025 **CHICAGO
HEMODYNAMIC
FORUM**

FRIDAY
Nov. 14, 2025

OVERVIEW

The Chicago Hemodynamic Forum was established to initiate a national conversation about standardization of right heart catheterization. The goal of this conference is to discuss best practices in hemodynamic assessment and interpretation across the spectrum of cardiovascular disease processes.

The Chicago Hemodynamic Forum will present a national conference solely focused on invasive hemodynamics! Come join the discussion on hemodynamic nuances of heart failure across the EF spectrum, pulmonary hypertension, cardiogenic shock, exercise hemodynamics, continuous remote monitoring, LVADs, and more. Learn the most up-to-date understanding of invasive cardiovascular physiology from experts in the field.

TARGET AUDIENCE

The Chicago Hemodynamic Forum has been designed to meet the educational needs of Heart Failure, Interventional, Critical Care, and General Cardiologists, along with Associated Advanced Practice Providers, Nurses, and Trainees.

This activity has been approved for *AMA PRA Category 1 Credits*[™]

LOCATION

The University of Chicago, David Rubenstein Forum
1201 East 60th Street, Chicago, IL 60637
