

We specialize in rigging and relocating any size machinery and equipment.

### Plant Relocations

No matter if your project is large or small, M&L Riggers can handle the entire job.

#### Our services include:

- Dismantling and Re-installing Machines
- Light and Heavy Machinery Moving
- Unique Rigging for Heavy Equipment
- Warehousing Available
- Cleanroom and Machine Handling
- Transportation & Trucking Coordination
- Custom Crating Available

### Turnkey Services

M&L Riggers and UPMP can handle your entire relocation, from project planning to complex lifting to transportation. We're experts in unique rigging for heavy equipment and dismantling and re-installing large complex machinery systems. Whether it's a single machine, or moving and setting up the entire plant, you can be confident that M&L Riggers and UPMP will get it done right.

### Fabrication & Welding

Custom fabrication and precision welding. Our certified team of welders have made construction beams, conveyor modifications and can fabricate to your specifications.

### Millwright

Our millwrights are seasoned professionals experienced in the installation, leveling and alignment of all types of complex industrial machinery, equipment and conveyors. We will adjust, repair, dismantle, reassemble, set, level and install whatever kind of new and used machinery necessary. Putting our knowledge and expertise to work, we will ensure your project is completed on time, safely and within budget.

### Custom Crating

Our team will build durable custom crating for any size or piece of equipment for any type of transport. We can also "bag" or "wrap" equipment to ensure the best protection from the elements.
