

Just Spray The Weeds

Efficiency

Reduce the amount of chemical applied by up to 90%

Control

Accurately spray only the weeds and not the whole field

Innovation

Update your existing or new boom spray to precision spot spray

Green on Brown spot spraying technology

**Designed to be
Simple, Reliable and Accurate**

With the increased need for efficiency and precision in weed control, SenseSpray simply delivers spot spraying.

The patent pending SenseSpray system accurately detects individual weeds, and rapidly triggers individual solenoids to enable pin point precision spraying.

SenseSpray has been designed for simplicity in use via ISOBUS, or the SenseSpray app that effortlessly connects via WiFi allowing the operator to easily monitor, adjust and update the system

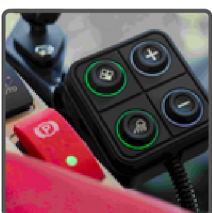

Simply designed for easy setup and accurate operation with system status via ISOBUS or the SenseSpray app

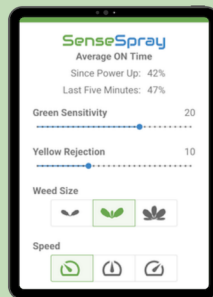

Utilise your existing guidance, rate and section controller technology. The patent pending SenseSpray system runs in parallel with your existing technology. Designed to scale to fit the size of your boom.

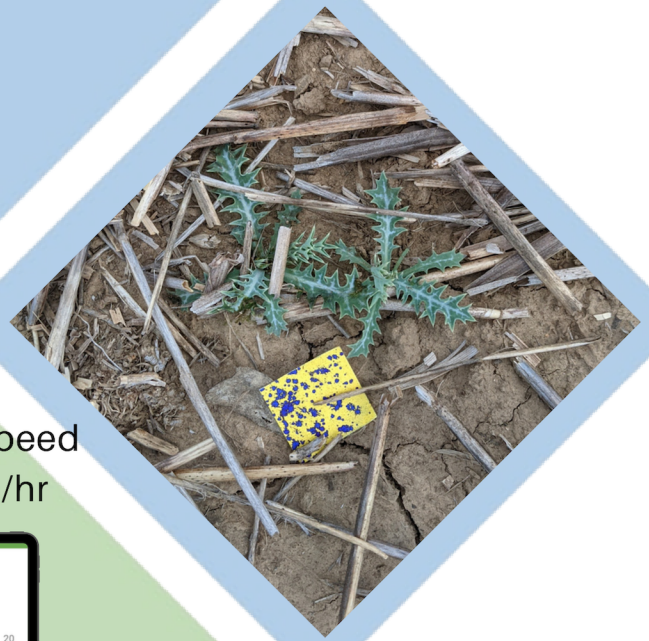

Easily remove cameras when not spot spraying

Operation speed up to 18km/hr

Accurate detection of weeds in fallow fields day or night
