

Efficiency

Reduce the amount of chemical applied by up to 90%

Control

Accurately spray only the weeds and not the whole field

Innovation

Update your existing or new boom spray to spot spray

Green on Brown spot spraying technology

Simply designed to be Accurate, Easy and Reliable

With the increased need for efficiency and precision in weed control, SenseSpray simply delivers spot spraying.

The patent pending camera software accurately targets individual weeds, and rapidly triggers individual solenoids to enable pin point precision spraying.

SenseSpray has been designed for simplicity in use, the SenseSpray app effortlessly connects via WiFi allowing the operator to easily monitor, adjust and upgrade the system

Simply designed for easy setup , accurate operation and system status via the SenseSpray app

Utilise your existing guidance, rate and section controller technology. The patent pending SenseSpray system runs in parallel with your existing technology. Designed to scale to fit the size of your boom.

Easily remove cameras when not spot spraying

Accurate detection of weeds in fallow fields day or night

Operation speed upto 18km/hr
