

Set Up Browser Authenticator for MFA

This method uses the Authenticator extension for Edge, Chrome, or Firefox. When you sign in, Microsoft sends a code to the extension to verify your identity.

Only set up Browser Authenticator if you have access to Edge, Chrome, or Firefox. This method is device-specific.

1 Add the **Authenticator: 2FA Client** extension to the browser you use to sign in to Ford applications: [Microsoft Edge](#), [Chrome](#), or [Firefox](#).

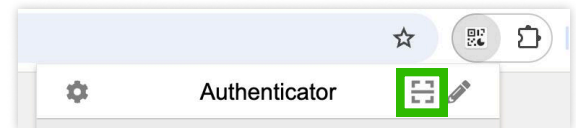

2 Pin the extension to the browser toolbar

3 Navigate to <https://mysignins.microsoft.com/security-info>

Sign in with **your-user-ID-here@b2bford.com**

4 Select **'+ Add sign-in method'** → **'Microsoft Authenticator'** → **'I want to use a different authenticator app'**

5 Select **'Next'**. Use your browser extension to capture the QR code. Follow the prompts

✓ You can now sign in using Browser Authenticator as an MFA Method
