HSN
WAREHOUSE

HSN WAREHOUSE

Self supporting structure

Warehouse

HSN WAREHOUSE buildings are designed for warehouse, workshop and storage uses.

Long span building

HSN WAREHOUSE buildings are available with 30'-40'-50' width configurations. Interior height is 16'

Cost effective

Reduced shipping volume and light steel components ensure extremely cost effective product

Reduced shipping volume

The components are packed and transported in knockdown configuration in standard shipping containers/trucks

Minimized number of components

HSN WAREHOUSE modules require very low maintenance and are designed to withstand harsh field conditions

Relocable

The simplicity of the system allows at a later date to dismantle the structure, move and re-assemble it

Bolted assembly system

HSN WAREHOUSE buildings are designed for semi-permanent and permanent projects

Quality

Compliant with all European Standards

Thermal insulation:

Walls and Roof: R-13 Foam Core Metal Sandwich Panels are standard. Other materials and R-Values available upon request.
