

Bethlehem Authority Police Report

Feb 2026

Eric Yeakel

Spray Valve Ice Mountain

1. With the extreme cold and deep snow, ATV traffic is not occurring on the property. The snowmobiles however have made their way out and about. Several tracks can be seen throughout the property with nothing found to identify a violator. Several residents in the area have snowmobiles and there are so many tracks in the surrounding area it is impossible to say who may have gone where.
2. The tracks on the UTV have been beneficial for getting around in this year's snow. The snow is light and powdery so we did find some difficulty in extremely steep terrain, but we were able to work around those areas to keep moving forward. If the temperatures weren't so low it would be a more pleasant experience. It is still better than getting a truck stuck in the snow.
3. The Wild Creek gate is now operational. There were a few delays with card access for everyone which was corrected quickly. There is still a few minor issues with the desk top monitors, but the gate works. Now that the gate is operating we will hopefully have the remaining fence installed this year.
4. The Pole barn garage is now having the electric installed. With temperatures warming up this week it should be finished soon.
