ASSOCIATION INTERNATIONALE  
DES INTERPRÈTES DE CONFÉRENCE  
INTERNATIONAL ASSOCIATION  
OF CONFERENCE INTERPRETERS

AIIC *Voices*® is now available.  
A new way of *listening* to us.

A new way of listening  
to *simultaneous*  
*interpretation*  
at *multilingual* events.

**AIIC Voices®** is a  
*Bring-Your-Own-Device (BYOD)*  
solution allowing you to listen  
to conference interpreters  
on your own smartphone  
or tablet. You can download  
**AIIC Voices®** from the  
*Apple Store* or *Google Play*,  
and it works across both  
Wi-Fi or 3G/4G networks,  
with huge benefits for everyone.

Find out *why...*

## A VERSATILE SOLUTION

**AIIC Voices®** is the ideal BYOD solution for simultaneous interpretation at events both large and small: technical and scientific conferences, workshops, or Board of Directors and shareholder meetings. With **AIIC Voices®** you can follow more than one session at the same event.

## BENEFITS FOR ORGANISERS

One of the most significant cost items at multilingual events is the rental and handling of receivers.

**AIIC Voices®** comes to your rescue.

1

It is often difficult to predict how many attendees will actually require simultaneous interpretation. **AIIC Voices®** is the answer! Cut headset rental costs with its scalable access activation plan.

2

If an event involves only one or just a few foreign language speakers, why even bother with distributing headsets?

**AIIC Voices®** is the solution!

3

With **AIIC Voices®**, there is no queuing to collect and return simultaneous interpretation headsets. Attendees use their own earphones, with savings on hardware rental costs. What's more, organisers won't need to hire extra staff or risk paying for missing or damaged headsets.

4

Will some participants be unable to attend in person?

**AIIC Voices**® is the perfect choice. Just enter the *Event Code* to join the meeting remotely, from anywhere, and select a simultaneous interpretation channel or follow the speaker by tapping on the *Floor* button.

5

**AIIC Voices**® is a good option when simultaneous interpreters are working on-site or remotely from an ISO 20108 and ISO PAS 24019 compliant hub.

## BENEFITS FOR USERS

**AIIC Voices**® is a clever and handy solution. A smartphone, or tablet, is all you need: no queuing up to collect and return interpretation headsets.

Users may choose to connect to a WI-FI network or use their own mobile data plan. Data usage for one hour is less than 45 MB.

## HOW TO USE AIIC VOICES®

Download **AIIC Voices**® from the Apple Store or Google Play

Enter the *Event Code* provided by the organisers

Select the room you want to listen to (this option is available only for parallel sessions)

Select the language you want to listen to.

***You are all set to listen to the conference through the voice of an AIIC Italia interpreter.***

Press "*Disconnect*" to close the APP

Press "i" to learn more about **AIIC Voices**®

By setting '*allow phone calls*' in your system preferences, the simultaneous interpretation will resume automatically when your call ends.
