Girls Build Camp Leader

Our Girls Build Summer Camp is an initiative designed to empower girls ages 10 - 16 by introducing them to construction and skilled trades in a supportive and engaging environment.

The Girls Build Summer Camp Leader is responsible for coordinating and executing the Girls Build Summer Camp, a hands-on construction and trades experience for girls. This internship is ideal for students pursuing studies in education, nonprofit management, construction management, event planning, or a related field.

Construction Site Supervisor

The Construction Site Supervisor Intern will assist the Housing Programs Specialist with the planning, coordination, and execution of new home construction and home repair projects. This internship is ideal for students studying construction management, civil engineering, architecture, or a related field. The intern will gain hands-on experience in project oversight, site safety, volunteer coordination, and construction techniques.

Online Retail Store

The ReStore supports the mission by reselling donated furniture, appliances, building materials, and more, with 100% of proceeds funding local Habitat programs. We are excited to rebrand and relaunch our online retail store to expand our reach, increase revenue streams, and drive traffic to our brick-and-mortar location.

This is an exciting opportunity for a motivated & creative individual. The intern will gain hands-on experience in e-commerce development, marketing strategies, donor cultivation, and retail operations.

Capacity Building Specialist

We collaborate with a diverse range of partners to develop housing initiatives that address local needs. This internship provides an opportunity to engage directly with communities and support efforts that enhance affordable housing, home repairs, and wraparound services.

The Capacity Building Specialist will play a key role in fostering partnerships, gathering community input, and shaping programs that respond to local housing and service needs. The intern will coordinate outreach efforts, facilitate listening sessions, and assist in developing initiatives based on community feedback.
