Re: Annual Asphalt Overlay and Concrete Replacement Program
Letter of Reference

To whom it may concern,

KJ Unnerstall Inc. (KJU) and the City of Washington have worked together on many transportation projects. The Annual Asphalt Overlay and Concrete Replacement Program focuses on bringing all the City's streets and sidewalks into a serviceable condition by replacing concrete panels, sidewalks, and curb gutter. KJU has been a consistent bidder and has participated in the projects as the prime contractor or sub-contractor on the majority of the projects let.

KJU takes the extra step to communicate to the public and works diligently to reduce the overall construction impacts to the citizens of the community. The workmanship and responsiveness to the needs of the projects has been excellent.

I would recommend KJ Unnerstall Inc. to other agencies and look forward to working with them in the future.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Nilges', is written over the word 'Sincerely,'.
