

# The Cleani's Proven Effectiveness

## The Science behind our solution: AQUALUTION®

Aqualution is a liquid disinfectant that kills 99.99% of germs\*\*, bacteria\*, and viruses\*\*\*, including the virus that causes COVID-19 in 60 seconds on hard non-porous surfaces. It is made by running an electrical current through brine water. This creates a low-PH solution made from water and hypochlorous acid (HOCl) which breaks down to a saline solution and is gentle to use around children and pets.

## Clinical Trial Success

In both studies, a misting solution like The Cleani reduced bacterial loads of door handles by over 99%.

### Food Processing Factory

A 2021 clinical trial at a food processing factory saw our misting solution successfully removed 99.999% of bacteria and viruses on hand touch sites after 5 minutes.

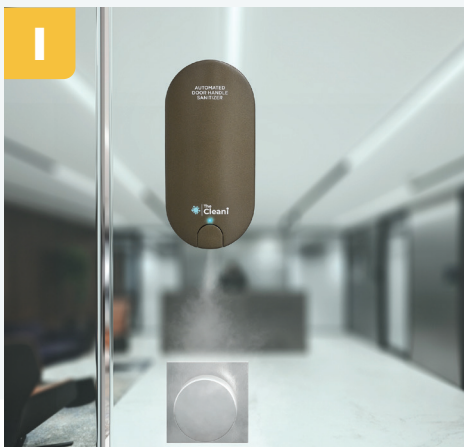

### A Public Hospital

A 2021 clinical trial at an NHS hospital in the U.K. showed that our misting solution successfully removed 99% of bacteria on door handles.
