POST PRINTING LOW MINIMUMS - QUICK TURNAROUND

HOT STAMPING

For a metallic image, hot stamping is the best option. A plate is created then, through heat and pressure, the foil is transferred to the surface of the product. We offer a wide range of foil colors including metallic, matte and gloss.

INK PRINTING

Fast and economical, ink printing is a process through which ink is transferred from a flexible plate to a product's surface. Ink printing is best for 1- or 2-color designs when tight registration is less critical. It's ideal for printing uncoated boxes and bags which allow for better ink absorption.

SILK SCREEN PRINTING

Ink is transferred to a product through a fine screen. This method is very precise and is ideal when multiple colors are needed and registration is critical. It's also a great choice when you have specific PMS colors to match.
