Punch Speed

Measure the speed of each punch

Calories Burned

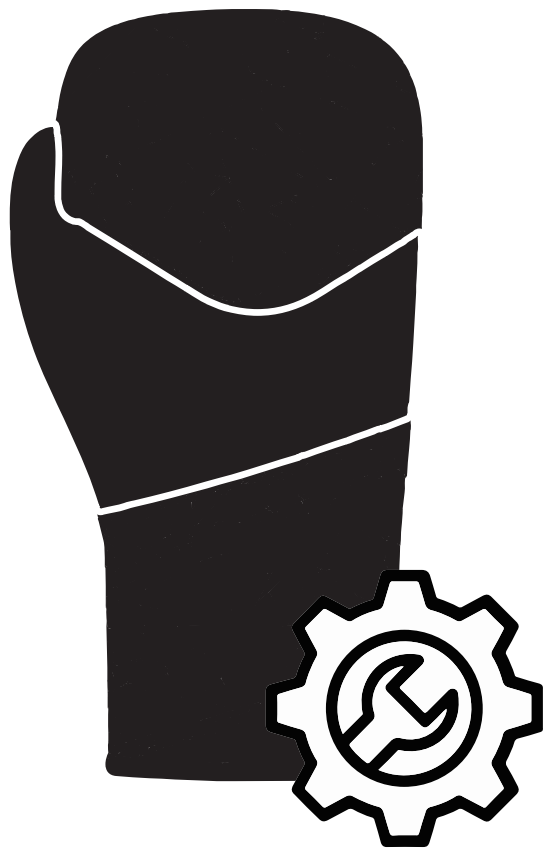

Estimation based on the intensity of the boxing session

Training Timer

A timer for rounds or intervals

AR Marker Feature

To showcase current and future products like gloves.

Maintenance

Immediately after training, remove the gloves from the bag and unfold them to dry. Never leave them in the bag or in damp conditions

Regular maintenance is key. We recommend brushing the suede after each training session to remove dirt and salt from sweat, which can degrade the material over time.

Note: We also recommend after each use of the gloves, wipe your hands with a damp cloth and apply a moisturizing cream.
