

Equipment Rental

High quality equipment
and services

One stop shop: As your single source supplier
we'll address all your equipment needs

We understand the need for all types of additional equipment in your field operations and can provide you with highest quality equipment and customer service.

AN ENHANCED SERVICE

- > Local operations — We operate locally, meaning you can reach us exactly when you need our services
- > Direct dealing — There is no middleman, we will manage your request directly
- > Reliable equipment — Our equipment is modern and well maintained – most of our units are less than two years old
- > Environmentally-friendly — Because West Texas is our home, we care about our groundwater quality. Portable sanitation solutions are inherently good for the environment.

CUSTOMER SERVICE

At W&W Energy Services we take pride in offering quality customer service. This starts from the time the customer places their order and continues every step of the way.

call – call us today for your
equipment needs!**

Equipment Rental

High quality equipment and services

Trash trailers | Combo trailers | Portable restroom rentals

Removing any waste or junk trash from the oilfield or construction job site can be much easier with the use of a trash trailer. We have a variety of trash trailers for rent. Our trailers are completely enclosed with expandable metal to keep trash from blowing out on location or during transport. Ideal for oilfield or construction site trash, we will deliver a trash trailer to your site and provide 24-hour service, maintenance and removal services.

We work hard to provide easy access to a wide variety of high quality and convenient portable toilet rentals in the Permian Basin.

Our portable toilets are the best way to ensure sanitation in places where toilets are not readily available.

Our portable sanitation services include more than just toilets. They also include portable urinals and handwashing stations. Simply put, we offer a complete sanitation solution at cost-effective rental prices. These toilets are the best solutions in situations and areas where normal plumbing and sanitation are not available.

Cool-Down trailers

The West Texas heat is brutal, and your crews need access to cool-down trailers to keep them healthy and productive. This mitigates the chances of overheating and heat strokes that can affect workers during the hot summer months.

Water buffalo trailers

Access to water in West Texas is limited. We can provide water for water packing road crossings and ditches where pipelines are installed as well as water for hydro-vacking services.

JCB tele skid | New Holland skid steer

Oilfield and construction operations need tele skid and skid steers to move heavy equipment and material safely and efficiently. We have modern, well-maintained skid steers that are less than two years old.
