

Facility Projects & Construction

One-stop-shop capabilities

No surprises: We assure safe, on-time, in-budget, high-quality facility project delivery and construction.

W & W Energy Services support our clients to build and maintain top-tier facilities that drive efficient production, while maintaining safe operations and asset integrity. We have a dedicated team of experts who are committed to delivering dependable on-the-ground construction, solving any problems that come up along the way – ‘no surprises’ is our goal.

By joining forces with Petrofac, we can now deliver top-of-the-line, standalone or fully integrated construction, engineering, procurement and specialty services that span the entire oil and gas asset lifecycle. This includes the build, modification and expansion of tank batteries, salt water disposals, well pads, pump stations and more.

With Petrofac we can leverage our local skills and Petrofac's global engineering, procurement and construction management capabilities to build single facilities or manage complete facility construction programs.

Regardless of the size or scope of a project, our teams work cohesively, efficiently and meticulously from start to finish to ensure the highest standards of safety and quality in delivery.

ENHANCED SAFETY

- > Leveraging global construction safety best practices
- > Designs with safe construction and operability in mind
- > Full risk reviews, integrity and assurance plans
- > On-site safety best practices

ENHANCED PERFORMANCE

- > Highly-skilled and well-trained personnel
- > Designs optimized for the Permian
- > Efficiency through standardization and modularization
- > Integrated interface management
- > Leveraging Petrofac's \$3bn per year procurement spend
- > Quality control at all phases
- > Seamless handover into operations

Safer, faster and more efficient project delivery that promises ‘no surprises’.

Facility Projects & Construction

One-stop-shop capabilities

TECHNICAL ADVANTAGES

- > Fit-for-purpose project management systems, tools and procedures
- > Dashboard reporting of progress and key issues
- > Digital tools for connected construction and progress tracking

PROJECT MANAGEMENT

Our multi-skilled team can provide you with:

- > Recommended concepts and solutions
- > Constructability reviews
- > Estimates
- > Project execution plans
- > Resource requirements
- > Interface planning
- > Vendor and package management
- > Cost control
- > Transparent progress reporting
- > Document management
- > Final testing and commissioning
- > As-builts and projects close-outs

SUPPORTING OPTIMIZED OPERATIONS

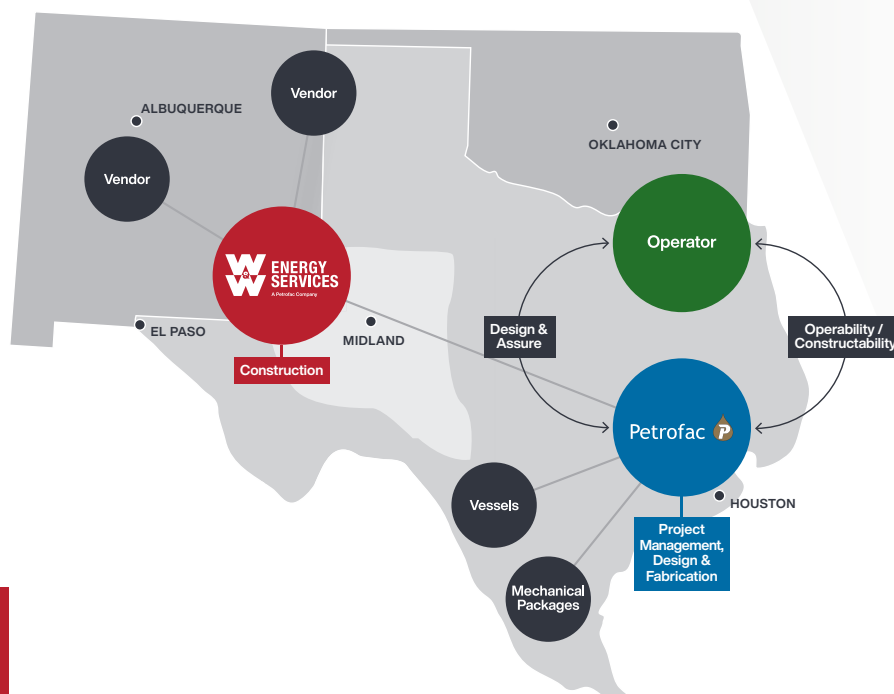

We also provide ongoing operations, maintenance, spares and integrity management systems and procedures to ensure facilities continue to deliver top-tier performance for decades after initial construction.

SERVICE HIGHLIGHTS

- > Project and program management
- > Engineering, design and procurement
- > Civil construction management
- > Concrete construction
- > Sandblast and painting services
- > Structural welding
- > Piping fabrication
- > Tank battery construction
- > Hydrostatic testing
- > Roustabout services
- > Compressor installation

INTEGRATED PROGRAM MANAGEMENT

One-stop-shop for successful project delivery.
