

SIREN FX 5-Minute Proxy Reference Fix for your FX Benchmark activities

Based on independently observed data using a transparent TWAP (Time Weighted Average Price) methodology. Solving for cost efficient, real-time benchmark pricing to support complex trading strategies, business operations, valuations and financial planning.

Reference Fix stimulates the FX Market Prices

- SIREN FX 4pm Reference Fix calculated using mid-spot FX prices from 3:57:30pm to 4:02:30pm & published at 4:05:00pm
- Available via an API
- Easily integrated into your workflow

Reference Fix uses FCA Regulated Benchmark Mid Spot prices from NCFX

- Data used is based on independent data from up to 14 ECN's
- Provides an independent & transparent reference rate
- 67 Benchmark quality currency pairs chosen
- Provides sufficient coverage and tailorable packages to fit your unique needs

Future Enhancements

- A one second feed during the time that the Reference Rate is calculated, to enable firms to monitor the rate being calculated to reduce tracking errors

Unlock your organisation's potential savings by participating in our study.

Take part in our FREE 2-month trial

01

Our team will provide access to your chosen currency pairs

02

Undertake the trial to see how we can help you reduce risk and tracking errors

03

How It Works

Innovation

- Providing a cost-effective alternative 5-minute reference rate using independent data.

Transparent Methodology

- SIREN FX employs a transparent and publicly available methodology for calculating its rates, enhancing trust and confidence among users with regular updates on changes

Market Reflective Rates

- 67 Currency Pairs are calculated and published promptly using independent data from 14 ECN's.

Minimisation of Market Manipulation

- By using a robust calculation window and TWAP methodology, SIREN FX provides accurate pricing and reduced slippage.

Multi-Functional Use

- The rates are used for various purposes, including valuation, settlement, trading, risk management, and performance benchmarking.

System Integration

- SIREN FX rates can be easily integrated and uniquely tailored to your needs. Using an API for operational efficiency providing automated and seamless integration into trading and risk management systems.
