

Form and Function

Elevolt's modular handrails are custom designed for your installation requirements. Our versatile rail system is designed for both illuminated and non-illuminated applications. With material options available in stainless steel 316 or 304.

The Elevolt illuminated handrail solution features an architecturally pleasing continuous light flow throughout the railing system which provides both safety and ambience.

Engineered for commercial, industrial or residential applications. Modular and flexible design does not require welding. Quick connect components allow for a fast and easy installation with multiple options for wall, post and glass mount.
