## ABOUT THE ARTIST

Classically trained artist Ge Feng was born in China during the Cultural Revolution (his name, Ge, means revolution). Feng has spent half of his life in China, where he studied Chinese painting, and the other half in England. This unique personal history unfolds in his work with a fusion of Oriental and Western philosophies. "I like to think of my art as a fusion of the best of both East and West," he said.

Feng has been making and selling his unique, handcrafted greeting cards for over 20 years. His company, Forever Cards Ltd., is located in the beautiful countryside near Ross-on-Wye, England. Feng crafts each greeting card from his studio in an old English farmhouse.

Fusing cutting-edge laser technology with his infinite imagination, Feng pushes the boundaries of laser-cutting to create his masterpieces. Among the best-selling cards in Europe, his intricate designs have earned him two Henries and buzz across the globe.

We are excited to share the amazing artwork and laser cutting skills of the Forever Card Collection from England. We are passionate about sending a card that is a gift of its own. In this digital-crazed world, we often don't realize the impact that a handwritten card can have on someone. How many times have you received the same greeting for a birthday or special occasion? Our handmade, Forever Cards provide something completely unique and different from the boring old experience! Not to mention that a purchase of a Forever Card product supports our women-run, personal business. So you can be proud of what you send and who you are supporting in the process!

The card you KEEP...
