Expert Firearms Instruction by Retired Law Enforcement Officer & Range Master
NRA HAS APPROVED LASER PISTOL MARKSMANSHIP SIMULATOR TRAINING

Tuition: $39 (per student/per hour) *Save $$$ Buy Five Hour Block $175*

The **NRA** has approved Laser Pistol Marksmanship Simulator Training that's ideal for beginners to learn pistol safety and marksmanship or provide experienced shooters with a way to fine tune their skills. Laser pistol training equates to **NO LIVE FIRE!** Laser pistol training is perfect for introducing students to handguns and also excellent for one-on-one shooting instruction before students take a live fire class.

Training focuses on the fundamentals of handgun safety, pistol marksmanship and we demystify topics such as stance, grip, sight picture, trigger, breath control and proper follow through. We use a high-tech *Shot Indicating Resetting Trigger (SIRT)* professional training laser pistols that are totally safe yet, hefty enough to feel realistic and has functional trigger, magazine and sights. This is paired with another futuristic *Laser Activated Shot Reporting, (LASR)* system that records & analyzes every shot. The end result, you'll leave the class knowing the basic marksmanship fundamentals and know when applied; they really work.

5150 HEAT Has Changed the World of Firearms Training!

✓ Train far more often, save time and $$$
✓ Train your draw from your holster and work on full range of motion without concern for safety
✓ Train with movement, moving around corners, up & down stairs, moving for cover & concealment
✓ Train with multiple targets and angles, inside and outside buildings & vehicles
✓ Train with barriers, cover, and concealment setting up anything you want
✓ Train with immediate and recorded reporting and feedback
✓ Train without fear of an accidental discharge: 100% safe, (But, please don't stare at the laser!)
✓ Train in your home, the most likely place where you may need to use deadly force, (with your personal trainer/instructor)
✓ Train for any conditions, any position, any light conditions, any weather, any situation and/or any scenario
✓ Train with a Laser Pistol that has the features of a Glock 17/19/22/43/S&W M&P & Revolver (Not affiliated with Glock or S&W)
✓ Our USCCA Basic Handgun & Home Defense Courses include introductory **Laser Pistol; (SIRT & LASR) Range Time**.
✓ Additional Laser Pistol Range Time available at $39 per/hr. private; 10% discount: pairs & groups - **Great for Team Building**
✓ **5150 HEAT** is able to offer tactical training & street survival skills instruction at the Professional Law Enforcement level.

GOING TO THE RANGE IS EXPENSIVE & INCONVENIENT: And, worse yet it leaves the shooter with **HUGE TRAINING GAPS!** The major problems with relying on live fire range training alone are: **Cost:** Ammo is expensive and sometimes hard to find. Add to that the range fees, targets, gear, cleaning your weapons; your transportation to and from the range, plus the long wait times at a crowded live fire range just isn't something most of us can do every week. **Full Range of Motion:** Pulling the trigger is one thing but professionals know you also need to train drawing the firearm from your concealed holster, readying the firearm, getting into a stance & grip, reloading, malfunctions and re-holstering the gun. Not only do most ranges have rules against this but it can also be very dangerous to train these skills with a fully loaded firearm. **Stationary:** Real life never holds still, except at the range and you're probably only allowed to stand still and fire at a single stationary target. This doesn't prepare you for a world where targets move and you need to move too. **Single Target:** Both indoor & outdoor ranges have rules against setting up multiple targets but in real life you shouldn't bet your life on engaging a single assailant. **Rapid Fire:** Not allowed, don't even thing about it!
