

Pudsey St Lawrence Cricket Club Environmental Policy

Our Commitment:

Pudsey St Lawrence Cricket Club is committed to minimising any adverse impact on the environment from its activities and will in particular:

Strive to ensure the levels of land, air and water pollution to be as low as possible.

Comply with all local relevant environmental legislation.

Maintain an efficient and effective process of waste disposal, distribution and recycling in conjunction with Leeds City Council.

Continue to ensure that all activities that take place at Pudsey St Lawrence Cricket Club will be as energy efficient as possible, in accordance with all local governmental guidelines where possible.

Encourage suppliers and contractors of any works or services provided to work within this environmental policy and to buy or use goods and materials from sustainable sources where possible.

Be aware of and actively support any environmental initiatives in the local and surrounding area.

Our Contribution:

We will strive to ensure that our building and ground is as aesthetically pleasing as possible, when open to the local community.

We will promote low waste usage, the re-use and recycling of waste and monitoring of waste transfer arrangements to ensure safe disposal.

We will continually explore new ways to reduce electricity use during the cricket, football, rounder's and running seasons.

We will continue to collect rainfall and recycle on to the ground, through our integrated watering system

We will continue to promote the recycling and re-use of personal equipment and clothing used when undertaking sports at the club e.g. cricket, football, rounders and running.

We will continue to ensure that the ground equipment we use is regularly serviced and maintained to minimise any potential adverse effect on the environment.
