National Diabetes Foundation

The National Diabetes Foundation is a non-profit organization established in 2021 in California, United States. The Foundation is dedicated to public health care, medical treatment research on natural medicine to prevent and treat diseases, and

charitable work.

Programs: research and development of natural medicine, traditional Chinese medicine, acupuncture and TaiMing hand needles; prevention and treatment of diabetes and diabetic complications, including tumors and infertility; subsidizing students who are impoverished due to illness and dropping out of school; undertaking administrative functions entrusted by the government; joint relevant social organizations and institutions to become a natural science group for disease prevention and health development; popularize and promote natural knowledge, scientific knowledge, and scientific and technological achievements; establish sub-station organizations in some administrative regions and large enterprises with large numbers of diabetes and tumor diseases.

National Diabetes Foundation would work hand in hand with everyone, help each other, enjoy the gift of nature together, and strive for a healthy way to live a healthy life over a hundred years old.
