

IATF 16949 TRANSITION

IMPLEMENTATION SERVICES

Are you ready for the transition to the new IATF 16949 standard?

Some of the key changes to IATF 16949 include:

- The new IATF/TS-16949:2016 Standard requires compliance to both IATF and the ISO-9001:2015 base standard. Although, the two are separate documents the site must be compliant to both standard(s).
- Formatting of the 10-clause structure, in line with the ISO 9001:2015 standard
- Incorporation of Customer Specific Requirements (CSRs) into your QMS.
- Increased focus on interested parties, stakeholders and company performance
- New requirements for risk-based thinking and risk mitigation throughout the entire QMS and processes.
- New requirements for corporate responsibility
- New requirements for product safety
- Clarification of organizational knowledge
- More focus on external processes, products and services
- Expansion on contingency plan requirements
- New requirements for Alternative Methods
- New requirements for products with embedded software
- New requirements for supplier management and development
- New requirements for Second Party Audits
- New competency requirements for First/Second Party Auditors

How we can help? We are involved the beginning of the transition process to the end. This includes but is not limited to:

Performing a Gap Analysis - On-site visit to determine gaps between your QMS and the IATF requirements

Company Processes Identification-We work with your team to identify the QMS processes, process owners, and develop process maps and metrics.

Risk Analysis -We work with your team to identify the risks within the QMS processes and contingency plans

QMS Documentation Development - We work with your team to develop your Policy Manual, and related QMS procedures/documentation

CSR Matrix Development– We will help identify your CSR requirements and develop a matrix to show where identified within your QMS

Training – We will provide training for Management, Employees and Internal Auditors

Internal Audit and Second Party Audits – We can provide qualified Internal Auditors to perform your internal or second party value-added audits

Supplier Management Program – We will work your team to develop a supplier risk analysis, selection, evaluation and development

Coaching and Consultation - On an as needed we provide guidance, and answer questions to ensure effective implementation of the IATF and CSR
