## JINGLE, JANGLE AND CLANG

Santa's elves are cheerful, magical helpers who assist Santa Claus in preparing for Christmas. Originating in 19th-century Scandinavian and American folklore, these tiny, industrious beings craft toys, care for reindeer, and manage Santa's workshop at the North Pole. Their playful yet hardworking nature has made them a beloved symbol of holiday magic and joy. In German folklore, elves were originally considered spirits of any kind. Each Ornament 7" Tall

These ornaments, typically made from glass, feature a clip at the base that allows them to securely attach to tree branches. First popularized in the late 19th century in Germany, clip-on ornaments were often shaped like birds. Their design allowed for creative placement, such as filling a void with a festive object within the tree's foliage. Today, clip-on ornaments are cherished collectibles, blending nostalgia with a timeless ability to enhance the beauty and balance of Christmas tree decorations.

KRAMPUS 2023

In German folklore, Krampus is a horned, goat-like creature who punishes naughty children during the Christmas season, contrasting Saint Nicholas, who rewards the good. Rooted in Alpine pagan traditions, Krampus remains a vivid part of European holiday celebrations, especially during festive Krampus runs. Measures 6" Tall
