

CRANBROOK

SCHOOLS

To Whom It May Concern:

On February 20th, our school witnessed a powerful moment of truth as Fentanyl Fathers shared their local authentic stories and vital knowledge with our 9th and 10th-grade students. Their presentation transcended mere information delivery; it forged an emotional connection, fostering a profound understanding of the devastating impact of fentanyl and counterfeit pills. The students were deeply engaged, their post-presentation feedback reflecting a genuine shift in awareness.

The impact was palpable, and the overwhelming positive voices of parents resonated with gratitude. One parent expressed, "_____, came home yesterday with very positive things to say about the assembly. _____ learned a lot, and I think it really opened his eyes to a problem we have talked about often but it's more impactful than hearing it from your parents. Please keep programming organizations like this." This sentiment, along with similar expressions of appreciation from faculty and administrators, underscores the transformative power of Fentanyl Fathers' work.

We are dedicated to building upon this success by bringing Fentanyl Fathers back to engage our 11th and 12th graders and our parent community. Their message is essential, their impact undeniable. We strongly recommend Fentanyl Fathers to any institution seeking to protect and educate their students and families.
