To Whom It May Concern:

It is my pleasure and honor to recommend Fentanyl Fathers to any school or youth organization that is interested in preventing unnecessary harm and untimely deaths due to fentanyl poisoning.

I first became aware of Fentanyl Fathers during the 2023-24 school year when my own daughter came home from high school, sharing that she had attended an extremely impactful, informative, and emotional assembly at school regarding the dangers of fentanyl. I made a call to her school's principal, who shared that he was likewise impressed.

Upon contacting Fentanyl Fathers, I found that the organization was organized, communicative, flexible, and responsive to all of our needs. Michigan chairperson Michael Gillette was extremely professional and easy to work with. We discussed the Fentanyl Fathers presentation and he provided examples and references.

Mr. Gillette was happy to modify the presentation at our specific request and to partner during the presentation with the Alliance of Coalitions for Healthy Communities in Oakland County.

When it came time for the actual presentations, all three Walled Lake high schools experienced impactful presentations that engaged auditoriums full of impressionable students. One could hear a pin drop during the presentation, with students riveted on the message presented by Fentanyl Fathers, which centers around safety, health, and wellbeing.

Many parents, students, teachers, and mental health staff (counselors, school psychologists, and social workers) voiced their appreciation for these impressive presentations.

We look forward to having Fentanyl Fathers return to our school in the future, and I recommend that any school or youth organization has Fentanyl Fathers present to their children. Lives will be saved.

Sincerely,

Kyle Meteyer
Principal
Walled Lake Central High School
