To Whom It May Concern,

I am writing to enthusiastically recommend the Fentanyl Fathers program for your consideration. I had the pleasure of hosting them at Seaholm High School and was truly impressed by their presentation.

The Fentanyl Fathers provided a captivating and informative assembly that addressed the serious issue of fentanyl abuse. Their knowledge and expertise on the subject were evident, and they delivered their message in a way that was both engaging and relatable to our students.

The program's focus on prevention and education was particularly valuable. The Fentanyl Fathers shared real-world experiences and statistics that helped students understand the devastating consequences of drug use. Their approach was sensitive and thoughtful, creating a safe space for open discussion.

I was particularly impressed by the positive response from our students. They found the assembly to be interesting and informative. The Fentanyl Fathers' ability to connect with young people was a testament to their skill and passion.

I wholeheartedly recommend the Fentanyl Fathers program to any school organization seeking to raise awareness about the dangers of fentanyl and promote healthy choices. Their dedication to making a difference is truly commendable.

Sincerely,

Michael Wicker
Principal
