

I saw many birds while bushwalking. I made a tally mark each time I saw a crow, a cockatoo, a noisy miner, or a brush turkey, as shown in the following graph.

Which birds did I see most of? \_\_\_\_\_

Which birds did I see least of? \_\_\_\_\_

How many more brush turkeys than crows did I see? \_\_\_\_\_

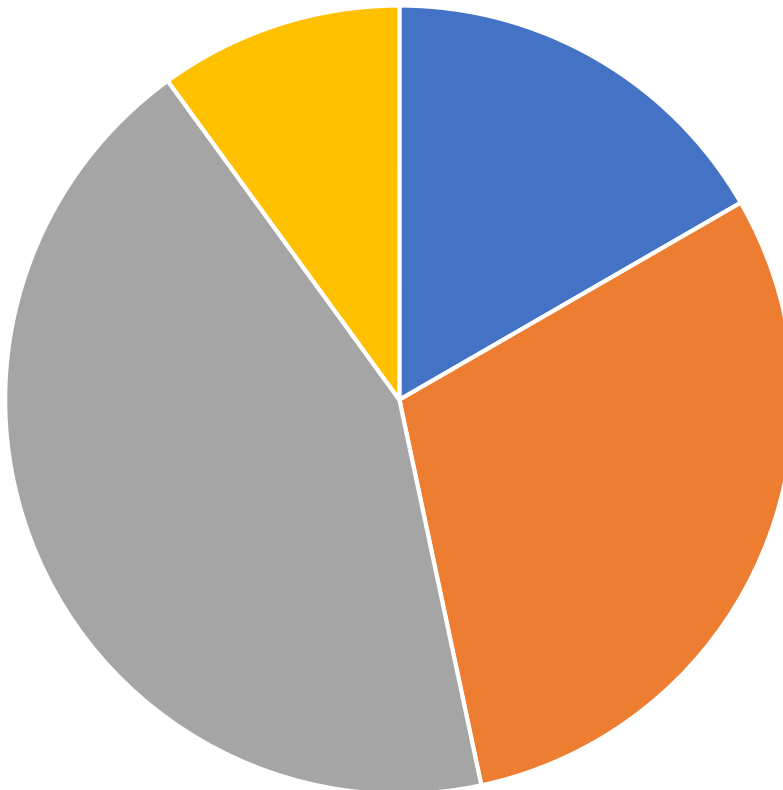

Draw a column graph to display the data from my fruit shopping. I bought apples, mandarins, bananas, pears, peaches and oranges.

Class 4M were asked their favourite takeaway meal. The following shows their responses:

Burger	5
BBQ Chicken	9
Pizza	13
Kebab	3

Label the sector graph to match the data.

Think of something you would like to know about you classmates. Collect data to find out. Then choose an appropriate graph type to use and display your data.
