

10/27/2025	Satellite OPU Default Schedule Description
10/15/2025	Donor Pre-Synch - Insert a CIDR (if not pregnant) and give GnRH (2cc Cystorelin) to reset their follicular wave and allow for best results at DFR.
10/21/2025	DFR (GnRH am/pm) - Give GnRH (2cc Cystorelin) to donors morning and night allowing a new wave of follicles to emerge.
10/22/2025	Mating possibilities due to jessica@bishoprepro.com by noon Wednesday prior to OPU
10/23/2025	FSH am/pm - Give FSH at 12 hour intervals to encourage uniform growth of follicles.
10/24/2025	FSH am/pm - Give FSH at 12 hour intervals to encourage uniform growth of follicles.
10/25/2025	FSH am/pm - Give FSH at 12 hour intervals to encourage uniform growth of follicles.
10/27/2025	OPU Collection Date - At OPU collection, oocytes are searched and placed in maturation tubes immediately, then shipped overnight to Boviteq. We will contact you with oocyte recovery numbers and confirm your final mating choices.
11/3/2025	Morula Report - When planning fresh transfers, we will receive a morula report with the number of good and poor quality embryos that are growing.
11/4/2025	Freeze Report/DFR - Your donor's recovery information including number of frozen embryos will be available via the Boviteq client portal and accessible both to our team and to you individually. If donors will be collected again the following week, this will also be the same day as DFR (GnRH injection) for the next OPU collection date.
