

6/17/25	Description
6/3/25	Drop off deadline - Donors may be dropped off 2-3 weeks prior to collection. We recommend bringing donors as early as possible to acclimate to their new diet and environment.
6/5/25	Donor Pre-Synch - Donors receive a CIDR (if not pregnant) and GnRH to reset their follicular wave and allow for best results at DFR.
6/9/25	Semen Deadline - Semen will ship from Bishop Repro to Boviteq every two weeks at no additional cost to the client. At this time, we need your first and second choice for matings. This can be updated on OPU collection day.
6/11/25	Dominant Follicle Removal - This is an aspiration procedure in which we remove the dominant follicle that is present, allowing a new wave of follicles to emerge.
6/13/25	FSH - Donors receive FSH twice daily to encourage uniform growth of follicles.
6/14/25	FSH - Donors receive FSH twice daily to encourage uniform growth of follicles.
6/15/25	FSH - Donors receive FSH twice daily to encourage uniform growth of follicles.
6/17/25	OPU Collection Date - At OPU collection, oocytes are searched and placed in maturation tubes immediately, then shipped overnight to Boviteq. We will contact you with oocyte recovery numbers and confirm your final mating choices.
6/24/25	Morula Report - We will receive a morula report with the number of good and poor quality embryos that are growing. This information will be used to dictate fresh embryo shipments.
6/25/25	Freeze Report/DFR - Your donor's recovery information including number of frozen embryos will be available via the Boviteq client portal and accessible both to our team and to you individually. On this day, we will DFR donors that are enrolled for the next OPU collection date.
