

## **Clinic Information**

Leaside Village Medical Clinic's mission is to improve the wellness and healthcare experience of our patients by providing holistic care in a multidisciplinary model. In our model, Family Doctors, Medical Specialists, Surgeons and Allied Health Practitioners work collaboratively to enhance the health of our patients.

Our clinic was founded and is owned by Dr. Darrell Ginsberg (Family Medicine-Hospitalist) , Dr Vinay Garg (Cardiology) and Dr. James Higgins (Orthopedic Surgery) who have been colleagues for over a decade and believed they could provide a better out-patient medical service for patients in the Leaside and Thorncliffe Community. They have a proprietary and ownership interest in this clinic. They have together developed the Leaside Village Family Health Organization, a large cardiology diagnostic service and an out of hospital surgical center in a fully accessible new clinic with ample free parking.

Our clinic has subspecialists and allied health professionals who work together and, if within your circle of care, share access to your medical chart. Any service recommended at this clinic can be sought at any other facility. Our doctors and staff are here for our patients and are happy to suggest or refer other practitioners if desired by our patients.
