What Is The AquaFlow Valve?

Introducing our newest innovation, refined over 15 years of extensive research and development. This cutting-edge device seamlessly integrates into your existing waterline, right after the meter.

Engineered with medical-grade SS316L stainless steel components, the AquaFlow Valve delivers measurable water bill savings from day one.

Unveiling the Powerful Features of Our Valve Technology

High Quality Medical Grade

Stainless 316L Steel

Improved Meter Accuracy

Precise Water Measurement

Calibrated To Your

Environmental Needs

Stops Water Hammering

Stabilizes Water Pressure

Fully Certified

IAPMO • NSF • ANSI • CAN 61

Proof Is In The Science

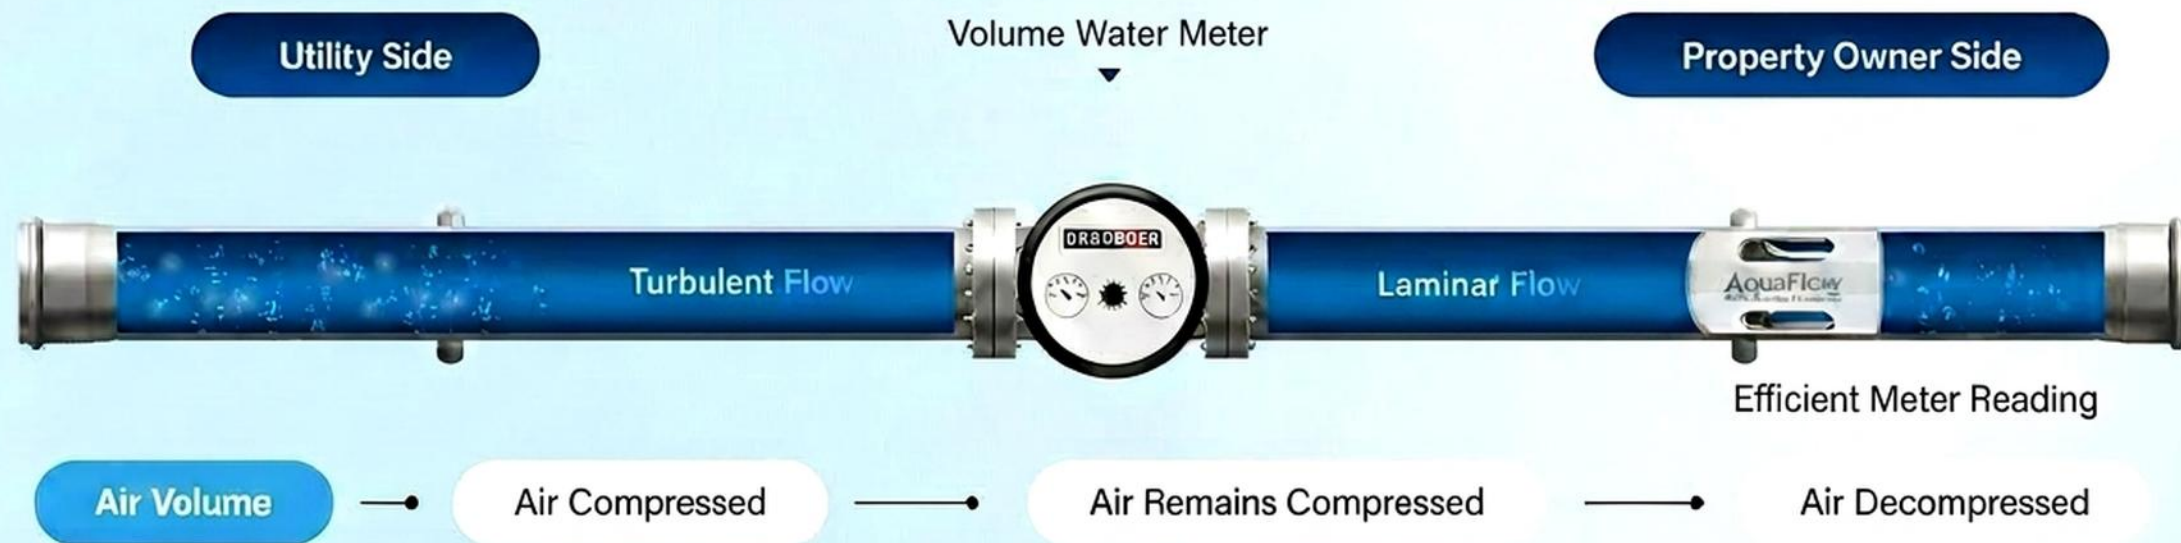

15 Years Innovation

Before the AquaFlow Valve Installed

Without the AquaFlow Valve, your water meter registers air as water — costing you up to 30% more every month.

After the AquaFlow Valve Is Installed

The AquaFlow Valve compresses accumulated air in the water line, creating laminar flow and accurate meter readings.

Precision Manufacturing Meets Full Compliance

Manufactured with the highest PSI-rated materials and using medical-grade components, the AquaFlow Valve ensures optimal water flow without any pressure loss. Fully certified and compliant with all major standards.

INDEPENDENT VERIFICATION

NSF International — Independent Laboratory Verified

- Founded 1944 · Ann Arbor, Michigan
- World's most respected independent testing laboratory
- Tests drinking water products, food equipment & health sciences globally
- Used by regulatory agencies in 180+ countries
- NSF testing = the gold standard for water product performance

NSF Engineering Laboratory Test Report

Testing Authority: NSF International

Location: 789 Dixboro Road, Ann Arbor, MI

Client: AquaFlow Technologies, Inc.

Client #C0002238

NSF Job #J-00063294

Sample: AquaFlow Valve (3/4") — Stainless Steel

Date: August 13-18, 2018

Protocol: Air flow measurement & Water main break simulation

NSF International

ENGINEERING LABORATORY TEST REPORT

Location of Testing:

NSF International
789 Dixboro Road
Ann Arbor, MI, 48103-0100

Client:

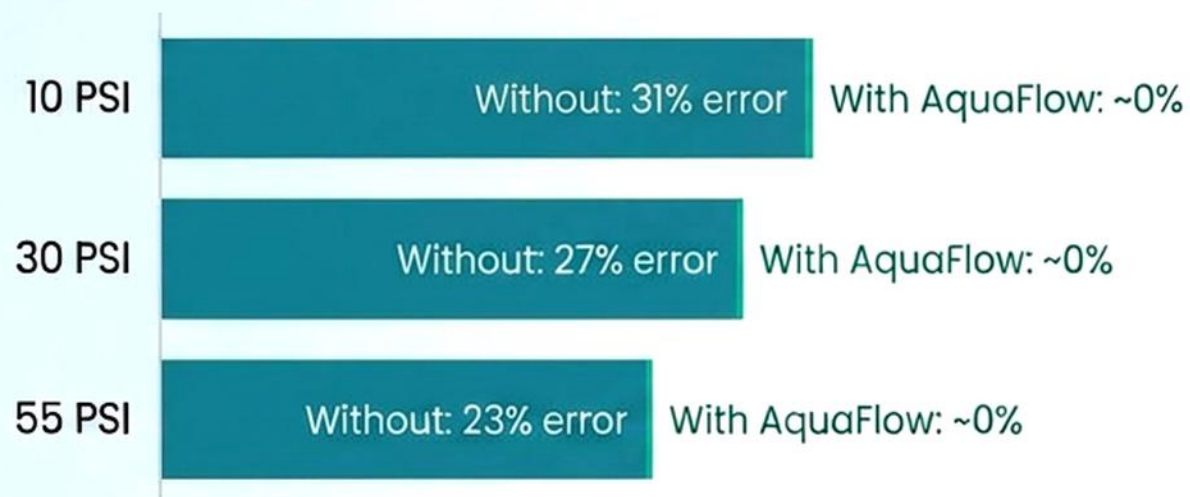

AquaFlow Technologies, Inc.

Independent third-party laboratory testing. Not marketing. NSF designed the protocol and ran the tests.

NSF Laboratory Test Results — Documented Performance

Test 1 — Air Infiltration Meter Error

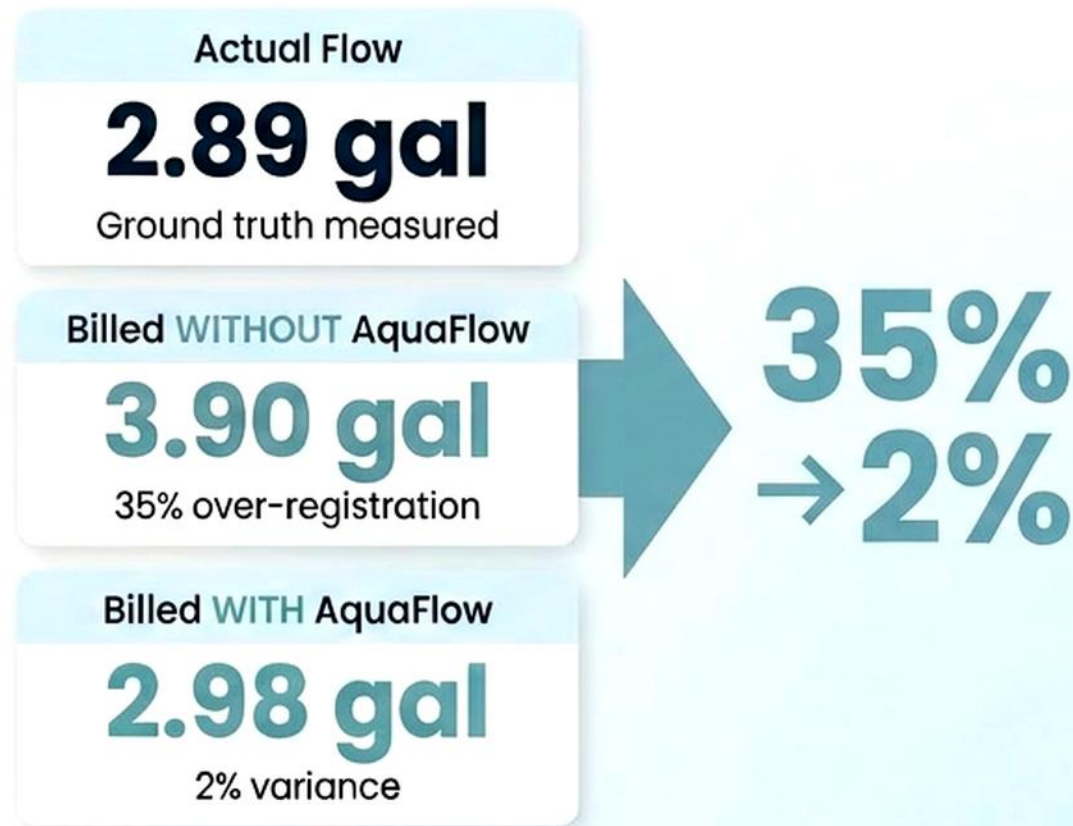

Without vs. With AquaFlow

Average: 27% air flow reduction

■ Without AquaFlow ■ With AquaFlow

Test 2 — Water Main Break Simulation

3-In-1 Technology

Saves You Money — Guaranteed

01 Efficient Meter Reading

Air & Gas Compression

Compacts trapped air & gases within the water lines, minimizing air volume before it reaches the water meter. Meters read volume — air + water.

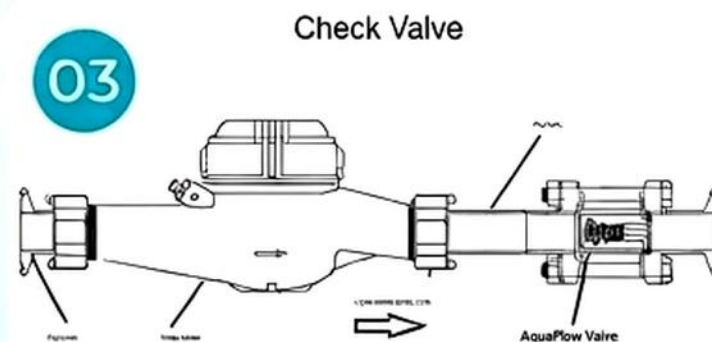

02

Flow & Pressure Regulator

Controls and optimizes flow & water pressure, cutting consumption by up to 6-9% while prolonging plumbing lifespan.

03

Check Valve

Stops water hammering, ensures one-directional flow, protecting equipment and maintaining pressure.

Wide Range of Sizes Available

Calibrated To Your Infrastructure Needs — Saving You Money

1/2" to 8"

Standard Sizes

Custom Up to 36"

Special Order

**Average Install
Less Than 1 Hour"**

Installation Time

It's not just a product; it's a solution designed to enhance your water management strategy, ensuring savings while contributing to environmental sustainability.

AquaFlow Makes It. ENETEC Delivers It.

Turnkey Water Efficiency — From Assessment to Portfolio-Wide Rollout

1 Site Survey & Water Audit

Experienced professionals assess your infrastructure and identify savings opportunities

2 Licensed Plumber Installation

Nationwide network, under 1 hour per unit

3 Post-Install Analysis

Metered verification of actual savings

4 Custom Engineered & Calibrated For Your Facility

Tailored sizing and configuration for maximum performance

5 Financial Modeling

Custom ROI projections for your property

6 Portfolio Scaling

Enterprise rollout across all locations

One partner. One contract. Complete accountability.

Five Steps to Verified Savings
