EARTH FRIENDLY PRODUCTS

OPTIMAL ORGANIC LAGOON TREATMENT

- Biodegradation of organic matter.
- Reduced solid-waste buildup.
- Improves odor and water quality of livestock manure storage.
- Decreases ammonia levels.
- Lowers Biological Oxygen Demand (BOD)
- Lowers Chemical Oxidation Demand (COD)
- Reduces turbidity and organic matter in water / wastewater
- Environmentally safe
- All natural, non-toxic

Customized blend of naturally-occurring bacteria design to accelerate waste material breakdown into water and carbon dioxide. The bacteria are selected to produce enzymes effective in breaking down protein, fat and carbohydrate in wastes. Optimal Organic competitively excludes pathogenic bacteria populations and enhances beneficial bacteria populations in waste matter.

Directions for Use: Seasonal Treatment
