

Metro Glass LLC is committed to providing high-quality auto glass replacement and repair services. This warranty outlines the terms and conditions for our glass replacement services.

Lifetime Warranty

Metro Glass LLC offers a lifetime warranty on workmanship for all auto glass replacements for as long as you own your vehicle. This warranty covers:

1. **Workmanship:** Issues related to the installation, such as wind noise, water leaks, and improper fitment.
2. **Defective Materials:** Manufacturer defects in the glass or adhesive used during installation.

If any covered issue arises, Metro Glass LLC will repair or replace the glass at no additional cost to the customer.

ADAS Disclaimer

Many modern vehicles are equipped with Advanced Driver Assistance Systems (ADAS) that rely on sensors and cameras often located near the windshield. While Metro Glass LLC performs glass replacement with precision and care, **ADAS recalibration may be required** after a windshield replacement to ensure proper functionality.

- **Customer Responsibility:** Metro Glass LLC does perform ADAS recalibration. It is the customer's responsibility to have the ADAS system recalibrated by the vehicle manufacturer or a certified technician after windshield replacement.
- **Warranty Limitation:** This warranty does not cover issues arising from failure to recalibrate the ADAS system after glass replacement.

Rock Chip Repair Disclaimer

Repairs are intended to restore the structural integrity of the glass and minimize the visibility of the damage but may not restore the glass to its original clarity. This warranty does not apply to additional damage caused by environmental factors, road debris, or improper vehicle maintenance.

Exclusions

This warranty does not cover:

1. Damage caused by accidents, vandalism, misuse, or external factors.
2. Glass breakage resulting from stress cracks or rust/corrosion on the vehicle's frame.
3. Repairs or replacements performed by another service provider.

For more information or assistance with ADAS recalibration, please contact us at 601-345-4029.
