

HEVI-13

DESCRIPTION

This gobbler-getter is back and better than ever. Loaded with HEVI-Shot® 12 g/cc tungsten, HEVI-13® offers 20 percent more effective range and energy than lead turkey payloads. The high-density material also yields higher pellet counts for better pattern density and an unprecedented number of lethal hits on target.

FEATURES

- Payload of 12 g/cc HEVI-Shot tungsten
- 20 percent more energy and effective range than lead
- All-range pattern density
- Reliable ignition
- Nontoxic

- 1 - All-season reliability
- 2 - Tungsten pellets
