

ATTENTION

BY AMMO

ATOM heralds a new era in modelling paints, with an exclusive range of colours to fill your projects with energy and creativity through each speck of colour.

Using an ultra-fine pigment, developed exclusively by AMMO, ATOM colours are water-based and behave like lacquer paints, meaning they offer unparalleled covering power and durability, while being self-levelling. This results in a paint which is uniquely easy-to-apply, by both brush and airbrush.

AMMO is the result of more than 20 years of experience in modelling, and the ATOM range brings together all of the knowledge we have acquired in that time, in order to create a totally new paint.

ATOM marca una nueva era en las pinturas de modelismo con una exclusiva gama de colores para llenar de energía y creatividad tus maquetas con cada partícula de color.

Con un pigmento ultra fino desarrollado en exclusiva por AMMO, las pinturas ATOM poseen una base de agua con el comportamiento de las lacas, proporcionando una capacidad de cubrición inigualable, lo que las hace resistentes y autonivelantes, aportándoles una facilidad de aplicación única tanto a pincel, como con aerógrafo.

AMMO es el resultado de más de 20 años de experiencia en el modelismo, y la gama ATOM recopila todo ese conocimiento adquirido a lo largo del tiempo, para crear una pintura totalmente nueva.

LIMITLESS APPLICATIONS

APLICACIÓN SIN LÍMITES

These new paints can be used to paint all types of models or dioramas, no matter their material, be it plastic, resin, photo etch, metal, wood, foam, putty, and much more. They are perfect for use on all modelling themes, such as military vehicles, aircraft, civilian vehicles, model railways, science fiction, naval models, dioramas, figures, wargaming and tabletop projects, and even remote control models, slot cars, and pre-built die-cast models.

ATOM is a true revolution in the way we paint, combining the best of both worlds, with the results of lacquer-based paint, but with all the advantages of water-based acrylics, such as being non-toxic and odourless. From now on, ATOM paints can be the foundation of all your modelling projects.

Con ellas podrás pintar absolutamente cualquier maqueta o diorama, independientemente del material del que estén hechos: plástico, resina, fotograbado, metal, madera, foam, masillas, etc. Y, por supuesto, podrás pintar modelos y escenografías de cualquier temática: vehículos militares, aviones, vehículos civiles, trenes, ciencia ficción, barcos, dioramas, figuras, wargames, juegos de mesa, e incluso vehículos de radio control, slot y die-cast.

ATOM es una auténtica revolución en la forma de pintar, combinando lo mejor de ambos mundos, dando los resultados de una laca pero con las propiedades de una pintura acrílica sin olores ni toxicidad. Ahora, ATOM será la base de todo tu modelismo.

WHAT IS ATOM?

¿QUÉ ES ATOM?

ATOM is a new type of paint specifically designed for modelling and formulated for maximum performance when applied with both brush and airbrush, with strong covering power and durability, and perfect flow and colour intensity. ATOM paints are also self-levelling and quick drying. These features mean that ATOM paints are easily applied using both brush and airbrush, achieving perfect coverage without obscuring fine details, and resulting in a smooth, uniform, durable, and matte finish.

ATOM paints are water-based, odourless, and non-toxic. They have been manufactured in compliance with the most recent and strict global safety regulations.

ATOM es un nuevo tipo de pintura específicamente diseñada para modelismo y formulada para potenciar al máximo todas las cualidades en su uso a aerógrafo y pincel: capacidad cubriente, resistencia, fluidez, intensidad, autonivelado y tiempo de secado, lo que hace que sea muy sencillo aplicarla tanto a aerógrafo como a pincel, cubriendo perfectamente sin tapar los detalles y dejando un acabado mate muy liso, uniforme y resistente.

Las pinturas ATOM tienen base agua, no tienen olor y no son tóxicas. Han sido fabricadas cumpliendo las nuevas y estrictas normativas mundiales de seguridad.

NEW AND EXCLUSIVE COLOURS

NUEVOS Y EXCLUSIVOS COLORES

The ATOM range includes 180 references covering a very broad chromatic range, from primary, bright, and intense colours, to metallics and washable colours. It also includes a specially formulated thinner for the entire range. In addition, the ATOM range also includes historically accurate colours for both aircraft and AFV camouflage schemes.

Once dry, ATOM paints are extremely hard-wearing and can withstand the application of all kinds of modelling and weathering products, such as acrylics and enamels, as well as masking tapes and decals. ATOM paints can be applied on top of, or under, any type of paint, including acrylics, enamels, and lacquers. One of the unique features of ATOM paints is their ability to be applied directly onto plastic and other materials, providing excellent adhesion even over very smooth surfaces.

La gama de colores ATOM incluye 180 referencias que abarcan todo el espectro cromático, desde los colores primarios, colores vivos e intensos, incluyendo también colores metalizados y lavables, aparte del diluyente acrílico específico para toda la gama. Además, la gama incluye los colores exactos para pintar camuflajes de aviones y vehículos militares.

Una vez secas son muy resistentes y podrás aplicar sobre ellas cualquier producto de suciedad y envejecido de tipo acrílico o esmalte, así como cintas de enmascarar y calcas. Las pinturas ATOM se pueden aplicar perfectamente antes o después de cualquier tipo de pintura, ya sea acrílica, esmalte o laca. Una de las características únicas de ATOM es la posibilidad de pintar directamente sobre el plástico u otros materiales con una alta capacidad de agarre incluso sobre superficies brillantes.

- **TOUCH DRY IN 10 MINS**
TIEMPO DE SECADO AL TACTO 10 MIN
- **FULLY CURED IN 24 HRS**
TIEMPO DE CURADO TOTAL 24 H
- **EASY APPLICATION BY BOTH BRUSH AND AIRBRUSH**
FÁCIL APLICACIÓN A PINCEL Y AERÓGRAFO
- **SELF-LEVELLING**
AUTONIVELADO
- **ODOURLESS**
SIN OLOR
- **WATER-BASED & NON-TOXIC**
BASE AGUA, NO TÓXICO
- **BEHAVES LIKE A LACQUER PAINT**
COMPORTAMIENTO DE LACAS
- **20ML CONTAINER**
ENVASE DE 20 ML
