Thanks for considering **LONG LIVE COUNTRY MUSIC** and for allowing us the opportunity to describe the product.

This is a live country concert event with real world class singers and professional Las Vegas musicians.

The production combines these three critical elements:

- An entertaining mix of current and classic country music performed by singers paying tribute to the biggest stars and their songs; not exactly an “impersonator” show but you’ll see our cast wearing a lot of different hats as they match the looks, voices and personalities of the singers they portray.
- **Real up-and-coming country artists** performing a short headline segment of their new original music. In keeping with the spirit and title of the show – LONG LIVE COUNTRY MUSIC – we want to do our part to showcase these young exciting artists to new audiences everywhere.
- The middle of the show features an intimate sit-down acoustic segment where the singers and musicians pay tribute to the iconic legends, each contributing a piece of musical history to the performance.

There is also a patriotic spirit that weaves through this show; country music is truly an American art form, and several members of our band and cast have served in the US armed forces with pride. During some powerfully emotional anthems, audiences may stand up and cheer for the flag, and if the folks on stage (or out front) shed a tear that’s part of the deal.

Thanks again for your time and consideration.
